The American Skyscraper Roberta Moudry, 2005-05-09 Publisher Description **The American Skyscraper, 1850-1940** Joseph J. Korom, 2008 The skyscraper is an American invention that has captured the public's imagination for over a century. The tall building is wholly manmade and borne in the minds of those with both slide rules and computers. This is the story of the skyscraper's rise and the recognition of those individuals who contributed to its development. This volume is unique: its approach, information, and images are fresh and telling. The text examines America's first tall buildings, the result of twelve years of in-depth research by an accomplished and published architect and architectural historian. Over 300 compelling photographs, charts, and notes make this the ultimate tool of reference for this subject. Biographies woven throughout with period norms, politics, and lifestyles help to place featured skyscrapers in context. Quite simply, there is no book like this. The text, carefully and insightfully written, is clear, concise, and easily digestible; the text being the product of well-documented original research written in an informative tone. *The American Skyscraper 1850-1940: A Celebration of Height* is a richly documented journey of a fascinating topic and it promises to be a superb addition to libraries, schools of architecture, students of architecture, and lovers of art. How Did Poetry Survive? John Timberman

Newcomb, 2012-03-20 *How Did Poetry Survive?* traces the emergence of modern American poetry at the turn of the nineteenth century. American poetry had stalled; a small group of recently deceased New England poets still held sway, and few outlets existed for living poets. However, the United States' quickly accelerating urbanization in the early twentieth century opened new opportunities as it allowed the rise of publications focused on promoting the work of living writers of all kinds. The urban scene also influenced the work of poets, shifting away from traditional subjects and forms to reflect the rise of buildings and the increasingly busy bustle of the city. Change was everywhere: new forms of architecture and transportation, new immigrants, new professions, new tastes, new worries. This urbanized world called for a new poetry, and a group of new magazines, entirely or chiefly devoted to exploring modern themes and forms, led the way. Avant-garde little magazines succeeded not by ignoring or rejecting the busy commercial world that surrounded them but by adapting its technologies of production and strategies of marketing for their own purposes. *Raymond Jonson and the Spiritual in Modernist and Abstract Painting* Herbert R. Hartel, Jr., 2018-02-21 This is the most thorough and detailed monograph on the artwork of Raymond Jonson. He is one of many artists of the first half of the twentieth century who demonstrate the richness and

diversity of an under appreciated period in the history of American art Visualizing the spiritual was one of the fundamental goals of early abstract painting in the years before and during World War I Artists turned to alternative spirituality the occult and mysticism believing that the pure use of line shape color light and texture could convey spiritual insight Jonson was steadfastly dedicated to this goal for most of his career and he always believed that modernist and abstract styles were the most effective and compelling means of achieving it

Compelling Form J. Donald Ragsdale, 2011-08-08 Compelling Form Architecture as Visual Persuasion is an assessment of the visual persuasiveness of buildings It demonstrates that architecture is as capable of social influence as speeches or advertisements are and that an awareness of this influence provides an insight into buildings cultural roles The book considers a diverse array of structures ranging from museums to performance halls to universities to cathedrals to governmental buildings to palaces and to skyscrapers Compelling Form is an important extension of theories of persuasion and visual communication to architecture and engineering The book bases its assessments on the elements of visual literacy and then on the elements of architectural design to demonstrate that buildings monuments and even such means of commerce as bridges affect the viewer in such a way as to have social impact **Otto Kahn** Theresa M.
