A delightful compendium of writing on plants The passion for gardening and the passion for words come together in this inspired anthology a collection of essays on topics as diverse as beans and roses by writers who garden and by gardeners who write Among the contributors are Christopher Lloyd on poppies Marina Warner who remembers the Guine rose and Henri Cole who offers poems on the bearded iris and on peonies There is also an explanation of the sexiness of castor beans from Michael Pollan and an essay from Maxine Kumin on how as Henry David Thoreau put it one makes the earth say beans instead of grass Most of the essays are new in print but Colette Katharine S White D H Lawrence and several other old favorites make appearances Jamaica Kincaid the much admired writer and a passionate gardener herself rounds up this diverse crew A wonderful gift for green thumbs My Favorite Plant is a happy collection of fresh takes on old friends Other contributors include Hilton Als Mary Keen Ken Druse Duane Michals Michael Fox David Raffeld Ian Frazier Graham Stuart Thomas Daniel Hinkley Wayne Winterrowd

### **The Ex Situ Conservation of Plant Genetic Resources**

J.G. Hawkes, Nigel Maxted, B.V. Ford-Lloyd, 2012-12-06 It is a distressing truism that the human race during the last millennium has caused the exponential loss of plant genetic diversity throughout the world This has had direct and negative economic political and social consequences for the human race which at the same time has failed to exploit fully the positive benefits that might result from conserving and exploiting the world's plant genetic resources However a strong movement to halt this loss of plant diversity and enhance its utilisation for the benefit of all humanity has been underway since the 1960s Frankel and Bennett 1970 Frankel and Hawkes 1975 This initiative was taken up by the Convention on Biological Diversity CBD 1992 that not only expounds the need to conserve biological diversity but links conservation to exploitation and development for the benefit of all Article 8 of the Convention clearly states the need to develop more effective and efficient guidelines to conserve biological diversity while Article 9 along with the FAO International Undertaking on Plant Genetic Resources promotes the adoption of a complementary approach to conservation that incorporates both ex situ and in situ techniques
