Stochastic Programming Methods And Technical Applications:

Stochastic Programming Methods and Technical Applications Kurt Marti, Peter Kall, 2012-12-06 Optimization problems arising in practice usually contain several random parameters. Hence in order to obtain optimal solutions being robust with respect to random parameter variations, the mostly available statistical information about the random parameters should be considered already at the planning phase. The original problem with random parameters must be replaced by an appropriate deterministic substitute problem, and efficient numerical solution or approximation techniques have to be developed for those problems. This proceedings volume contains a selection of papers on modelling techniques, approximation methods, numerical solution procedures for stochastic optimization problems, and applications to the reliability based optimization of concrete technical or economic systems.

Probabilistic Constrained Optimization Stanislav Uryasev, 2000-11-30 Probabilistic and percentile quantile functions play an important role in several applications such as finance, Value at Risk, nuclear safety, and the environment. Recently significant advances have been made in sensitivity analysis and optimization of probabilistic functions, which is the basis for construction of new efficient approaches. This book presents the state of the art in the theory of optimization of probabilistic functions and several engineering and finance applications, including material flow systems, production planning, Value at Risk, asset and liability management, and optimal trading strategies for financial derivatives, options. Audience: The book is a valuable source of information for faculty, students, researchers, and practitioners in financial engineering, operation research, optimization, computer science, and related areas.

Stochastic Programming Kurt Marti, Peter Kall, 1995-04-06 Proceedings of the 2nd GAMM IFIP Workshop on Stochastic Optimization: Numerical Methods and Technical Applications, held at the Federal Armed Forces University Munich, Neubiberg, Munich, Germany, June 15-17, 1993.

Physical Processes in Astrophysics Ian W. Roxburgh, Jean-Louis Masnou, 1995-09-18 This volume, in honour of Evry Schatzman, contains in-depth reviews on central topics of modern astrophysics, such as stellar physics, covering stellar evolution, solar neutrinos, stellar rotation and spin-down, convection, transport processes, neutron stars, white dwarfs, and novae. All the talks were given by leading experts who had time both to develop the basics of their subject and to cover recent work. The volume is meant for

both graduate students and researchers **Stochastic Optimization** Kurt Marti, 2012-12-06 This volume includes a selection of refereed papers presented at the GAMM IFIP Workshop on Stochastic Optimization Numerical Methods and Technical Applications held at the Federal Armed Forces University Munich May 29-31 1990 The objective of this meeting was to bring together scientists from Stochastic Programming and from those Engineering areas where Mathematical Programming models are common tools as e.g. Optimal Structural Design Power Dispatch Acid Rain Management etc The first theoretical part includes the papers by S.D. Flam H. Niederreiter E. Poechinger and R. Schultz The second part on methods and applications contains the articles by N. Baba N. Grwe and W. Roemisch J. Mayer E.A. Mc Bean and A. Vasarhelyi

Optimization Theory F. Giannessi, Panos M. Pardalos, Tamás Rapcsák, 2013-12-01 This volume contains refereed papers based on the lectures presented at the XIV International Conference on Mathematical Programming held at Matrahaza Hungary between 27-31 March 1999 This conference was organized by the Laboratory of Operations Research and Decision Systems at the Computer and Automation Institute Hungarian Academy of Sciences The editors hope this volume will contribute to the theory and applications of mathematical programming As a tradition of these events the main purpose of the conference was to review and discuss recent advances and promising research trends concerning theory algorithms and applications in different fields of Optimization Theory and related areas such as Convex Analysis Complementarity Systems and Variational Inequalities The conference is traditionally held in the Matra Mountains and housed by the resort house of the Hungarian Academy of Sciences This was the 14th event of the long lasting series of conferences started in 1973 The organizers wish to express their thanks to the authors for their contributions in this volume and the anonymous referees for their valuable comments Special thanks are directed to our sponsors the Hungarian Academy of Sciences the National Committee for Technological Development the Hungarian National Science Foundation and last but not least the Hungarian Operational Research Society We would like to thank John Martindale from Kluwer Academic Publishers for helping us produce this volume Eva Nora Nagy for corrections and proof readings and Peter Dombi for his excellent work on typesetting and editing the manuscript *Operations Research Proceedings 2003* Dino Ahr, Roland Fahrion, Marcus Oswald, Gerhard Reinelt, 2012-12-06 This volume contains a selection of papers referring to lectures presented at the symposium Operations Research 2003 OR03 held at the Ruprecht Karls Universität Heidelberg September 3-5 2003 This international conference took place under the auspices of the German Operations Research Society GOR and of Dr. Erwin Teufel prime minister of Baden Württemberg The symposium had about 500 participants from countries all over the world It attracted academicians and practitioners working in various fields of Operations Research and provided them with the most recent advances in Operations Research and related areas in Economics Mathematics and Computer Science The program consisted of 4 plenary and 13 semi plenary talks and more than 300 contributed papers selected by the program committee to be presented in 17 sections Due to a limited number of pages available for the proceedings volume the length of each

article as well as the total number of accepted contributions had to be restricted Submitted manuscripts have therefore been reviewed and 62 of them have been selected for publication This refereeing procedure has been strongly supported by the section chairmen and we would like to express our gratitude to them Finally we also would like to thank Dr Werner Muller from Springer Verlag for his support in publishing this proceedings volume

Handbook of Asset and Liability Management Stavros A. Zenios, William T. Ziemba, 2006-07-17 This first volume of the Handbook of Asset and Liability Management presents the theories and methods supporting models that align a firm's operations and tactics with its uncertain environment Detailing the symbiosis between optimization tools and financial decision making its original articles cover term and volatility structures interest rates risk return analysis dynamic asset allocation strategies in discrete and continuous time the use of stochastic programming models bond portfolio management and the Kelly capital growth theory and practice They effectively set the scene for Volume Two by showing how the management of risky assets and uncertain liabilities within an integrated coherent framework remains the core problem for both financial institutions and other business enterprises as well Each volume presents an accurate survey of a sub field of finance Fills a substantial gap in this field Broad in scope

Stochastic Programming Kurt Marti, Peter Kall, 2013-12-14 In order to obtain more reliable optimal solutions of concrete technical economic problems e.g. optimal design problems the often known stochastic variations of many technical economic parameters have to be taken into account already in the planning phase Hence ordinary mathematical programs have to be replaced by appropriate stochastic programs New theoretical insight into several branches of reliability oriented optimization of stochastic systems new computational approaches and technical economic applications of stochastic programming methods can be found in this volume
