Stockholm University A History:

Stockholm University Fredric Bedoire, Per Thullberg, 1987 CUCUMIS-SATIVUS L. 1976, Making Cultural History Anna Kallen, 2015-01-01 This volume contains 17 essays with fresh new approaches to cultural history from 17 authors that belong to different academic disciplines including archaeology art history classical languages ethnology fashion studies history history of ideas history of religion literature studies and media studies Making Cultural History has sprung out of the Research School for Studies in Cultural History at Stockholm University an interdisciplinary research program focusing on interplays between past and present The authors of this volume display a kaleidoscope of innovative approaches to traditional academic subjects such as celebrity literary genre prehistoric remains television and historic monuments The perspectives focus on obscure corners and gaps between the illuminated centers of traditional academic knowledge and create an understanding that all narratives representations and claims of culture and history are in some sense political Challenging disturbing inspirational these essays all make cultural history **The Soybean Through World History** Matilda Baraibar Norberg, Lisa Deutsch, 2023-06-30 This book examines the changing roles and functions of the soybean throughout world history and discusses how this reflects the complex processes of agrofood globalization The book uses a historical lens to analyze the processes and features that brought us to the current global configuration of the soybean commodity chain From its origins as a peasant food in ancient China today the protein rich soybean is by far the most cultivated biotech crop on Earth used to make a huge variety of food and industrial products including animal feed tofu cooking oil soy sauce biodiesel and soap While there is a burgeoning amount of literature on how the contemporary global soy web affects large tracts of our planet s social ecological systems little attention has been given to the questions of how we got here and what alternative roles the soybean has played in the past This book fills this gap and demonstrates that it is impossible to properly comprehend the contemporary global soybean chain or the wider agrofood system of which it is a part without looking at both their long and short historical development However a history of the soybean and its changing roles within equally changing agrofood systems is inexorably a history about globalization Not only does this book map out where soybeans are produced but also who governs wields power and accumulates capital in the entire commodity chain from inputs in production to consumption as well as identifying the institutional context the global commodity chain operates within The book concludes with a discussion of the main challenges and contradictions of the current soy regime that could trigger its rupture and end This book is essential reading for students practitioners and scholars interested in agriculture and food systems global commodity chains globalization environmental history economic history and social ecological systems Song Lyrics and Literary History Gunilla Hermansson, 2025-06-12 Paving new paths for the study of the history of literature this study explores the intricate networks of one single poem across two centuries the V rvindar friska a poem meant to be sung The Swedish song V

rvindar friska Fresh Spring Breezes started its public life in 1828 between the covers of a book as a poem written to a traditional melody Since then it has been reprinted translated performed and used in the most surprising contexts in different corners of the world This particular case may be rather exceptional but Gunilla Hermansson argues that the underlying dynamics are not and yet they have been underexposed in studies of literary history This exploration of V rvindar friska reveals the rich and intricate network of one text and uncovers new facets of how people have engaged with word art in their everyday lives in the modern era This network includes untraditional yet widespread uses of poetry and lyrics in lonely hearts columns and railway work and seemingly strange bedfellows such as a constellation of Nordic folk songs and American plantation songs The afterlives of this song evoke questions concerning class gender race citizenship technology and modernity from new angles as well as theoretical and methodological questions of circulation textual instability canonization paradigmatic turns uses and misuses Song Lyrics and Literary History demonstrates how poetry is transformed when shared across time borders media and social and ideological divides Being attentive to poetry meant to be sung Hermansson argues opens to a fuller and more representative picture of the cultural history of literature Times of History, Times of Nature Anders Ekström, Staffan Bergwik, 2022-02-11 As climate change becomes an increasingly important part of public discourse the relationship between time in nature and history is changing Nature can no longer be considered a slow and immobile background to human history and the future can no longer be viewed as open and detached from the past Times of History Times of Nature engages with this historical shift in temporal sensibilities through a combination of detailed case studies and synthesizing efforts Focusing on the history of knowledge media theory and environmental humanities this volume explores the rich and nuanced notions of time and temporality that have emerged in response to climate change **Contemporary Esotericism** Egil Asprem, Kennet Granholm, 2014-09-11 The study of contemporary esoteric discourse has hitherto been a largely neglected part of the new academic field of Western esotericism Contemporary Esotericism provides a broad overview and assessment of the complex world of Western esoteric thought today Combining historiographical analysis with theories and methodologies from the social sciences the volume explores new problems and offers new possibilities for the study of esoterica Contemporary Esotericism studies the period since the 1950s but focuses on the last two decades The wide range of essays are divided into four thematic sections the intricacies of esoteric appeals to tradition the role of popular culture modern communication technologies and new media in contemporary esotericism the impact and influence of esotericism on both religious and secular arenas and the recent de marginalization of the esoteric in both scholarship and society *The Dynamics of Economic Culture in the North Sea and Baltic Region* Hanno Brand, Leos Müller, 2007 The Agrarian History of Sweden Janken Myrdal, Mats Morell, 2011-01-07 Comprehensive and concise this account details the agrarian history of Sweden as it is defined by its present national borders from the Neolithic times to present day Key historical concepts and events are discussed including the introduction of planned agriculture alongside the

domestication of animals the feudal relationships and interactions between men and women various age groups and different social classes during the Middle Ages the changes brought about by industrialism and the development of political democracy the effects of World Wars I and II and Sweden's inclusion in the European Union in 1995 This study also examines the interdependence between agriculture and other industries as well as the relationship between agriculture and politics on a local regional national and international level Performativity and Performance in Baroque Rome Peter

Gillgren, 2017-07-05 A new interest in the study of early modern ritual ceremony formations of personal and collective identities social roles and the production of meaning inside and outside the arts have made it possible to talk today about a performative turn in the humanities In Performativity and Performance in Baroque Rome scholars from different fields of research explore performative aspects of Baroque culture With examples from the politics of diplomacy and everyday life from theatre music and ritual as well as from architecture painting and sculpture the contributors demonstrate how broadly the concept of performativity has been adopted within different disciplines
