Discovery ,1963 The Neolithic of South Sweden Mats P. Malmer,2002 This is a detailed study of the Neolithic cultures of South Sweden c 4000 2400 BC the Funnel Beaker culture TRB the Pitted Ware culture GRK and the Battle Axe culture STR Malmer presents a wealth of archaeological evidence and interpretation for the three great successive periods of economic change and innovation from hunting fishing to farming Malmer reaches the conclusion that these changes were not due to migration of people or improved climatic conditions but were due to economic ideological factors with new ideas being spread most likely by personal contact **Stone** Manfred Moser,2002-09-10 Are you intrigued by the giant stone sculptures bequeathed to us by our ancestors In awe at the ancient monuments Drawn in by the mysteries they hold Photographer Wilhelm Moser travelled the globe documenting these stones capturing their mystique and power **Archaeoastronomy** ,1985 **Visualising Skyscapes** Liz Henty,Daniel Brown,2019-08-19 Above the land and its horizon lies the celestial sphere that great dome of the sky which governs light and darkness critical to life itself yet its influence is often neglected in the archaeological narrative Visualising Skyscapes captures a growing interest in the emerging field of skyline archaeology This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam its contents have a wide reaching relevance for the fields of archaeology anthropology ethnography archaeoastronomy astronomy heritage and cultural studies The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world Visualising Skyscapes captures the growing interest in the multidisciplinary study of skylines and will be of interest to academics students and the general public as well as having international appeal It is topical timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images **Biomolecular Archaeology** T. A. Brown,Keri Brown,2011-02-08 Illustrated thoroughly Biomolecular Archaeology is the first book to clearly guide students through the study of ancient DNA how to analyze biomolecular evidence DNA proteins lipids and carbohydrates to address important archaeological questions The first book to address the scope and methods of this new cross disciplinary area of research for archaeologists Offers a completely up to date overview of the latest research in this innovative subject Guides students who wish to become biomolecular archaeologists through the complexities of both the scientific methods and archaeological goals Provides an essential component to undergraduate and graduate archaeological research **Feasible Management of Archaeological Heritage Sites Open to Tourism** Douglas C. Comer,Annemarie Willems,2018-08-07 Archaeological sites opened to the public and especially those highly photogenic sites that have achieved iconic status are often major tourist attractions By

opening an archaeological site to tourism threats and opportunities will emerge The threats are to the archaeological record the pre historic or historic materials in context at the site that can provide facts about human history and the human relationship to the environment The opportunities are to share what can be learned at archaeological sites and how it can be learned The latter is important because doing so can build a public constituency for archaeology that appreciates and will support the potential of archaeology to contribute to conversations about contemporary issues such as the root causes and possible solutions to conflict among humans and the social implications of environmental degradation In this volume we will consider factors that render effective management of archaeological sites open to the public feasible and therefore sustainable We approach this in two ways The first is by presenting some promising ways to assess and enhance the feasibility of establishing effective management Assessing feasibility involves examining tourism potential which must consider the demographic sectors from which visitors to the site are drawn or might be in the future identifying preservation issues associated with hosting visitors from the various demographic sectors and the possibility and means by which local communities might be engaged in identifying issues and generating long term support for effective management The second part of the book will provide brief case studies of places and ways in which the feasibility of sustainable management has been improved
