The stories that families tell ; narrative coherence, narrative interaction, and relationship beliefs Barbara H. Fiese, The Stories that Families Tell Barbara H. Fiese,1999 The Stories that Families Tell : Narrative Coherence, Narrative Interaction, and Relationship Beliefs Barbara H. Fiese,1999

The Stories that Families Tell: Narrative Coherence, Narrative Interaction and Relationship Beliefs Society for Research in Child Development,1999 The Stories that Families Tell Barbara Fiese,2001-04-25 Personal narratives are receiving considerable interest as reflections of important psychological processes Less attention however has been paid to how narratives are constructed among family members and serve as markers of family relationship functioning that directly affect child development This monograph describes the ways that narratives about personal experience are a central aspect of a family s attempt to make sense of their world and to share representations of relationships with their children The narratives used in this project came from family interviews conducted with four different samples using four different interview protocols

Family Stories and the Life Course Michael W. Pratt,Barbara H. Fiese,2004-04-26 This edited book draws from work that focuses on the act of telling family stories as well as their content and structure The process of telling family stories is linked to central aspects of development including language acquisition affect regulation and family interaction patterns This book extends across traditional developmental psychology personality theory and family studies Drawing broadly on the epigenetic framework for individual development articulated by Erik Erikson as well as on conceptions of the family life cycle the editors bring together contemporary examples of psychological research on family stories and their implications for development and change at different points in the life course The book is divided into sections that focus on family stories at different points in the life cycle from early childhood and the beginnings of narrative skill through adolescence young adulthood midlife and then mature adulthood and its intergenerational meaning During each of these periods of the life cycle research focusing on individual development within an Eriksonian framework of ego strengths and virtues is highlighted The dynamic role of family stories is also featured here with work exploring the links between family process intergenerational attachment and storytelling Sociocultural theories that emphasize how such development is situated in the wider cultural context are also featured in several chapters This broad lifespan developmental focus serves to integrate the exciting diversity of this work and foster further questions and research in the emerging field of family narrative The book is intended primarily for researchers and advanced level students in the fields of developmental and personality psychology as well as those in family studies and in gerontology It may also be of interest to those in the helping professions who are concerned with family therapy and family issues and may due to its content and illustrative material have appeal to a wider market of the lay public The chapters are written in a readily accessible style and the analyses are presented in a fairly non technical way Because family stories are charted across the lifespan it would be a suitable companion book to a more traditional lifespan textbook in

It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy, mathematics stories, family stories and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts from young children on the autism spectrum improving their social skills at school to four and five year olds developing historical thinking to children who are refugees or asylum seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists and teacher educators from several countries and backgrounds, the book fills a gap in the literature on narratives. This work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere. Collectively, the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years. The writing style is scholarly yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story look like. Mary Renck Jalongo, Journal and Book Series Editor, Springer, Indiana, PA, USA. *Handbook of Narratology* Peter Hühn, Jan Christoph Meister, John Pier, Wolf Schmid, 2014-10-10 This handbook provides a systematic overview of the present state of international research in narratology and is now available in a second, completely revised and expanded edition.
