Situating Sound And Rhythm:

Situating the Subject in Film Theory Veijo Hietala,1990 *Situating the Subject in Film Theory* ,1990 **The Art of Theatrical Sound Design** Victoria Deiorio,2018-09-20 Emphasising the artistry behind the decisions made by theatrical sound designers this guide is for anyone seeking to understand the nature of sound and how to apply it to the stage Through tried and tested advice and lessons in practical application The Art of Theatrical Sound Design allows developing artists to apply psychology physiology sociology anthropology and all aspects of sound phenomenology to theatrical sound design Structured in three parts the book explores theoretically how human beings perceive the vibration of sound offers exercises to develop support for storytelling by creating an emotional journey for the audience considers how to collaborate and communicate as a theatre artist and discusses how to create a cohesive sound design for the stage **Situating Mallarmé** David P. Kinloch,Gordon Millan,2000 Since his death just over a century ago Stéphane Mallarmé has become a major figure in world literature Over this period Mallarmé criticism has tended to concentrate on two aspects of his work Firstly on textual analysis in order to tackle the difficulty of his writing and secondly thanks to the interest shown in him by figures such as Barthes Derrida Kristeva and Lacan on his theoretical writings Indeed this particular part of his oeuvre has somewhat dominated Mallarmé studies in the last thirty years This book adopts a new approach by attempting to contextualise Mallarmé's creative writing in terms of his relationships with other art forms other writers and indeed other cultures At the same time one of his own key obsessions with death is also reassessed as is his relationship to the society of his time Mallarmé's ambitious project was to exploit the potential of dance music and painting as well as poetry in order to produce an artistic monument for the modern post industrial age Experts from all of these fields have therefore combined with literary specialists in order to adopt an interdisciplinary and comparative approach to Mallarmé's work which marks a bold and exciting new departure in Mallarmé studies **Sound Worlds from the Body to the City** Ariane Wilson,2019-03-13 This volume reveals the extent to which aural perception influences our spatial awareness Spanning various fields and practices from psychology to geography and from zoology to urban planning it covers a range of environments in which sounds contribute to forming our sense of space and place The contributions gathered here lead from the mother's womb through the habitats of insects and owls to the resonating bodies of buildings and the city to artistic endeavours that aim to consciously reveal the spatiality of sound In this progression the book demonstrates the profoundly constitutive role of hearing and listening at all stages of our biological and social development as well as the epistemological phenomenological and emotional importance of sound in relation to our construction of space As such it will appeal not only to architects town planners and artists but also to the growing community of scientists and scholars intrigued by sonic issues Differing from both quantitative acoustics and sound design its approach opens new perspectives on the sonic dimension and aural understanding of our environment by tracing analogies between a diversity of spaces formed when sound interacts with

listening as a mode of attention *Sound / image* Sarah Cardwell, Jonathan Bignell, Lucy Fife Donaldson, 2022-04-26 An exciting new strand in The Television Series the Moments in Television collections celebrate the power and artistry of television whilst interrogating key critical concepts in television scholarship Each Moments book is organised around a provocative binary theme Sound image reassesses the synergy between televisual images and sounds and music as a key creative interaction warranting closer attention Through close scrutiny of visual and sonic elements the book's chosen programmes are persuasively illuminated in new ways The book explores an eclectic range of TV fictions dramatic and comedic Contributors from diverse perspectives come together to expand and enrich the kind of close analysis most commonly found in television aesthetics Sustained detailed programme analyses are sensitively framed within historical technological institutional cultural creative and art historical contexts **Sonic Interventions** Sylvia Mieszkowski, Joy Smith, Marijke de Valck, 2015-07-14 Sonic Interventions makes a compelling case for the importance of sound in theorizing literature subjectivity and culture Sound is usually understood as our second sense and as our belief in a visually dominated culture prevails remains of secondary interest Western cultures are considered to be predominantly visual while other societies are thought to place more importance on the acoustic dimension This volume questions these assumptions by examining how sound differs from and acts in relationship to the visual It moves beyond theoretical dichotomies between the visual and the sonic the oral and literature and instead investigates sonic interventions in their often multi faceted forms The case studies deal with political appropriations of music and sounds they explore the poetic use of the sonic in novels and plays they develop theoretical concepts out of sonic phenomena and pertain to identity formation and the practice of mixing in hip hop opera and dancehall sessions Ultimately the book brings to the fore what roles sound may play for the formation of gendered identity for the stabilization or questioning of race as a social category and the conception of place Their intricate interventions beckon critical attention and offer rich material for cultural analysis *Oceans of Feeling* Ryan Walmsley, 2025-11-13 A groundbreaking exploration of postwar Caribbean migration to Britain Oceans of Feeling offers the first historical analysis of this defining moment in modern British history using the tools methods and theories of the history of emotions Decoding the emotional experiences and expressions of Windrush era Caribbean migrants this book reconstructs the migrant experience by asking not just what happened but how it felt individually and collectively and how these feelings shaped and configured the course of historical events Taking cues from spatial studies the history of the senses and the history of the body Ryan Walmsley charts a rich and affectively meaningful course through the experiential content of the migrant condition in a specific historical moment From the emotional bonds of the Mother Country ideology to the unique affective sensory atmospheres of transatlantic liners bound for Britain Oceans of Feeling reveals exciting new dimensions to Windrush era migration which have been masked under the canopies of social and political approaches A reflection of the history of emotions power to revivify historical narratives this book interrogates the emotional causes and consequences of

racist violence In doing so it reframes racism as a cluster of specific emotional concepts and expressions which provides fascinating insights into the lives of Caribbean migrants in this period This includes linking the disproportionate designation of Caribbean children as educationally subnormal in British schools to a constellation of emotional stereotypes and experiences It also explores private spaces such as dub and reggae house parties which migrants constructed as emotional refuge from the hostile atmosphere of public spaces and demonstrates how love and sex were politicised in the increasingly racialised atmosphere of postwar Britain *Situating Sound and Rhythm* T. V. Kuppaswami, 1999-01-01 In this book an attempt is made to gauge the distance between aesthetics nurtured by tradition and aesthetics demanded by external and varying climates of emotional response It is hoped that the book would cater to the needs of the lovers of music performing artistes and aspirants endeavoring to climb the ladder *Situating Cindy Sherman* Sarah Patricia Evans, 2004 *Indian Books in Print*, 2003 **The Oxford Illustrated Companion to South Indian Classical Music** Ludwig Pesch, 2009 This is a completely revised and updated edition of The Oxford Illustrated Companion to South Indian Classical Music which includes the latest available information on the subject Acclaimed as the most authoritative reference work on South Indian classical music the Companion provides an overview of the historical and cultural contexts of the music its instruments composers leading practitioners and schools contains more than 120 line drawings and photographs of all the instruments discussed as well as of major composers includes a special colour plates section includes detailed biographical notes on musicians and composers contains Guide to Pronunciation and Transliteration Select bibliography and Further Reading Glossary cum Index includes Alphabetical Index of Ragas and Scales Index of Names An indispensable and enriching reference work for the connoisseur practicing musician interested amateur impresario teacher and student the Companion will be of interest to anybody keen to learn about Indian culture **The Rhythmic Event** Eleni Ikoniadou, 2023-08-15 An investigation into the affective modes of perception temporality and experience enabled by experimental new media sonic art The sonic has come to occupy center stage in the arts and humanities In the age of computational media sound and its subcultures can offer more dynamic ways of accounting for bodies movements and events In The Rhythmic Event Eleni Ikoniadou explores traces and potentialities prompted by the sonic but leading to contingent and unknowable forces outside the periphery of sound She investigates the ways in which recent digital art experiments that mostly engage with the virtual dimensions of sound suggest alternate modes of perception temporality and experience Ikoniadou draws on media theory digital art and philosophical and technoscientific ideas to work toward the articulation of a media philosophy that rethinks the media event as abstract and affective The Rhythmic Event seeks to define the digital media artwork as an assemblage of sensations that outlive the space time and bodies that constitute and experience it Ikoniadou proposes that the notion of rhythm detached however from the idea of counting and regularity can unlock the imperceptible aesthetic potential enveloping the artwork She speculates that addressing the event on the level of rhythm affords us a glimpse into the

nonhuman modalities of thought proper to the digital and hidden in the gaps between strict definitions e g human sonic digital and false dichotomies e g virtual real Operating at the margins of perception the rhythmic artwork summons an obscure zone of sonic thought which considers the event according to its power to become

Categorizing Sound David Brackett,2016-07-19 Categorizing Sound addresses the relationship between categories of music and categories of people in other words how do particular ways of organizing sound become integral parts of whom we perceive ourselves to be and of how we feel connected to some people and disconnected from others After an introduction that discusses the key theoretical concepts to be deployed Categorizing Sound presents a series of case studies that range from foreign music race music and old time music in the 1920s up through country and rhythm and blues in the 1980s Each chapter focuses not so much on the musical contents of these genres as on the process of gentrification through which these categories are produced Provided by publisher
