Gordon Lawrence, 2018-07-03 Social Dreaming is the name given to a method of working with dreams that are shared and associated within a gathering of people coming together for this purpose In the first chapter he outlines some ideas on this phenomenon Here follows a wide ranging collection of essays on the experiences of various practitioners either personal or what they have found when taking this phenomenon into the wider social arena such as the church schools consultancy and working with children Social Dreaming Susan Long, Julian Manley, 2019-01-03 The idea of social dreaming argues that dreams are relevant to the wider social sphere and have a collective resonance that goes beyond the personal narrative In this fascinating collection the principles of social dreaming are explored to uncover shared anxieties and prejudices suggest likely responses enhance cultural surveys inform managerial policies and embody community affiliation Including for the first time a coherent epistemology to support the theoretical principles of the field the book reflects upon and extends the theory and philosophy behind the method as well as discussing new research in the area and how social dreaming practice is conducted in a range of localities situations and circumstances The book will appeal to anyone interested in the idea that social dreaming can help us to delve deeper into the question of what it means to be human from psychoanalysts to sociologists and beyond

Social Dreaming, Associative Thinking and Intensities of Affect Julian Manley, 2018-08-23 This book describes a way of sharing dreams in a group called social dreaming It explores how the sharing of real night time dreams in a group can offer information on and insight into ourselves and the worlds we live in and share It investigates how we can turn dream images and ideas and feelings that arise from these images into conscious thought before describing the ways in which these can be used Using a background of the psychosocial combined with a philosophical lens influenced by the work of Gilles Deleuze Julian Manley shows how social dreaming can be understood as a Deleuzian rhizome of affects a web or a root design where things interconnect in a random and spontaneous fashion rather than in a sequential or linear way He illustrates how social dreaming can link dreams together into a collage of images and compares this to the rhizome where clusters of emotional intensity which emerge from the dream images weave and interconnect with other clusters forming a web of interlinked dream images and emotions From the basis of this rhizome emerges an interpretation of social dreaming as a body without organs and the social dreaming matrix as a smooth space where meanings emerge from the way these images form connections and come and go according to our emotions at any particular moment
