Administration de la famille et de logement, 1969 **The Politics of Belgium** Marleen Brans, Lieven De Winter, Wilfried Swenden, 2013-09-13 For too long Belgium remained an unexplored terrain by comparative political scientists Belgium's politics were best known through the writings of Arend Lijphart who considered it a model case of consociationalism Over the past ten to fifteen years the analysis of consociationalism has been complemented by a more detailed coverage of Belgium's spectacular transformation process from a unitary into a federal state moving rapidly now to disintegration Likewise several peculiar aspects of Belgian politics such as the record fragmentation of its party system have been covered in edited volumes or international journals However given the complexity of the Belgian configuration of political institutions and actors any inclusion of particular aspects of the Belgian case in comparative work calls for an in depth and integrated understanding of the broader political system This is the first book which provides such an analysis It brings together a team of 19 political scientists and sociologists who aim to explain the dynamics and incentives of institutional change and seek to analyze the intricate interplay between the main institutional components of the Belgian body politic The sociological political and institutional determinants and the consequences of the federalisation process of Belgium is the central theme that links each of the individual chapters This book will be essential reading for students who want to understand the politics of Belgium and for anyone with a strong interest in West European Politics comparative politics and comparative federalism This book was published as a special issue of West European Politics *Growth to Limits* Peter Flora, 1986 No detailed description available for Appendix Synopses Bibliographies Tables Social Housing Policy Luc Laurent, Michel Jacques, 1986 **International Encyclopedia of Housing and Home**, 2012-10-09 Available online via SciVerse ScienceDirect or in print for a limited time only The International Encyclopedia of Housing and Home Seven Volume Set is the first international reference work for housing scholars and professionals that uses studies in economics and finance psychology social policy sociology anthropology geography architecture law and other disciplines to create an international portrait of housing in all its facets from meanings of home at the microscale to impacts on macro
