The Routledge Handbook of Contemporary Inequalities and the Life Course Magda Nico, Gary Pollock, 2021-12-30 Drawing upon perspectives from across the globe and employing an interdisciplinary life course approach, this handbook explores the production and reproduction of different types of inequality across a variety of social contexts. Inequalities are not static, easily measurable and essentially quantifiable circumstances of life. They are processes which impact on individuals throughout the life course, interacting with each other, accumulating, attenuating, reproducing or distorting themselves along the way. The chapters in this handbook examine various types of inequality, such as economic, gender, racial and ethnic inequalities, and analyse how these inequalities manifest themselves within different aspects of society, including health, education and the family, at multiple levels and dimensions. The handbook also tackles the global COVID-19 pandemic and its striking impact on the production and intensification of inequalities. The interdisciplinary life course approach utilised in this handbook combines quantitative and qualitative methods to bridge the gap between theory and practice and offer strategies and principles for identifying and tackling issues of inequality. This book will be indispensable for students and researchers as well as activists and policy makers interested in understanding and eradicating the processes of production, reproduction and perpetuation of inequalities.

Global Entangled Inequalities Elizabeth Jelin, Renata Motta, Sérgio Costa, 2017-11-08 This book presents studies from across Latin America to take up the challenge of exploring the plurality of social inequalities from a global perspective. Accordingly, it identifies the structural forces of social inequalities on a world scale as they shape asymmetries observed in a wide array of phenomena, such as racial and gender inequality, urbanization, migration, commodity production, indigenous mobilization, ecological conflicts and the new middle class. A rich contribution to the study of the interconnections between the global social structure and multiple local and national hierarchies, *Global Entangled Inequalities* brings consistently together a variety of conceptual approaches ranging from ethnographies to legal genealogies and will therefore appeal to scholars across the social sciences with interests in social theory, power analysis, intersectionality studies, urban studies and global social and environmental justice.
