Social Interaction And Personal Relationships:

Social Interaction and Personal Relationships Dorothy Miell, Rudi Dallos, 1996-06-06 The team has achieved an admirable overall coherence in representing the range of ideas, methodologies and modes of analysis that will be found in this area of social life. It is likely to find a place on the reading lists of many future social psychology courses. Journal of Community and Applied Social Psychology Relationships play a central part in people's lives and a number of exciting interdisciplinary perspectives have recently emerged to shed new light on what it means to be in a relationship with another human being. This volume offers an authoritative yet accessible examination of a wide variety of these perspectives drawing from a broader than usual range of material and including c Computer-mediated Communication in Personal Relationships Kevin B. Wright, Lynne M. Webb, 2011 Lynne M Webb Ph D University of Oregon is Professor in Communication at the University of Arkansas. She previously served as a tenured faculty member at the Universities of Florida and Memphis. Her research examines young adults' interpersonal communication in romantic and family contexts. Her research appears in over 50 essays published in scholarly journals and edited volumes including *Computers in Human Behavior*, *Communication Education*, *Health Communication* and *Journal of Family Communication*. Book Jacket **Communication in Personal Relationships Across Cultures** William B. Gudykunst, Stella Ting-Toomey, Tsukasa Nishida, 1996-08-07 Filling the void in interpersonal and intercultural communication, *Communication in Personal Relationships Across Cultures* examines the communication practices of non-Western cultures. The international cast of contributors assembled here leaves behind the biases typical of most research and theorizing done in this area of communication and enables the reader to develop a thorough understanding of how people communicate in non-Western societies. Chapters focus on communication practices in China, Japan, Korea, Mexico, Brazil, Iran, Africa, and totalitarian societies. Through both emic and etic approaches, this groundbreaking volume explores how members of a culture understand their own communication and compares the similarities and differences of specific aspects of communication across cultures. Covering all major theories in this expanding field and suggesting areas for future research, this engaging collection will interest both students and professionals in communication psychology and sociology. **Friendship and Social Interaction** Valerian J. Derlega, Barbara A. Winstead, 2012-12-06 A neglected topic in the field of personal relationships has been the study of friendships. Social psychologists have studied how and why individuals are attracted to one another and the processes of interaction during initial encounters, but they have not paid much attention to ongoing friendships. A major goal of the present volume is to develop theories and integrate research on the development and maintenance of friendships. Another major goal is to build bridges between social psychologists and other social scientists by presenting an interdisciplinary approach. Although a majority of the contributors are social psychologists, other authors include sociologists as well as developmental, personality, and clinical psychologists. The chapters also present research on friendship based on a wide range of research methodologies.

including laboratory research as well as longitudinal naturalistic and clinical studies. Hence the book incorporates a variety of conceptual and methodological approaches that should contribute to a cross fertilization of ideas among disciplines. The first chapter by Barbara A. Winstead and Valerian J. Derlega provides an overview of theory and research on friendship. The second chapter by Daniel Perlman and Beverley Fehr provides a summary and conceptual critique of social psychological theories of social attraction that are relevant to the study of friendship. Adopting a developmental approach, Duane Buhrmester and Wyndol Furman in Chapter 3 demonstrate the particular importance of friendship during middle childhood and adolescence in fulfilling interpersonal needs.

Handbook of Communication and Social Interaction Skills John O. Greene, Brant R. Burleson, 2003-02-26. Providing a thorough review and synthesis of work on communication skills and skill enhancement, this Handbook serves as a comprehensive and contemporary survey of theory and research on social interaction skills. Editors John O. Greene and Brant R. Burleson have brought together preeminent researchers and writers to contribute to this volume, establishing a foundation on which future study and research will build. The handbook chapters are organized into five major units: general theoretical and methodological issues; models of skill acquisition; methods of skill assessment; fundamental interaction skills, both transfunctional and transcontextual; function-focused skills informing persuading, supporting, skills used in management of diverse personal relationships, friendships, romances, marriages, and skills used in varied venues of public and professional life; managing, leading, teaching. Distinctive features of this handbook include broad, comprehensive treatment of work on social interaction skills and skill acquisition; up-to-date reviews of research in each area; and emphasis on empirically supported strategies for developing and enhancing specific skills. Researchers in communication studies, psychology, family studies, business management, and related areas will find this volume a comprehensive, authoritative source on communications skills and their enhancement, and it will be essential reading for scholars and students across the spectrum of disciplines studying social interaction.

Personal Relationships and Personal Networks Malcolm R. Parks, 2017-09-25. The effort to understand personal relationships has traditionally focused on the individual characteristics of participants. *Personal Relationships and Personal Networks* takes this analysis a step further, focusing on research linking participants' feelings and actions within a given personal relationship to the larger social context surrounding it. Author Malcolm R. Parks expands on the idea that the initiation, development, maintenance, and dissolution of relationships are inextricably connected to each participant's social network, a perspective that allows for a better appreciation of our connection to the world and a greater understanding of our significant power as social actors. This book offers a new way to consider basic notions about how relationships form, such as how particular people meet and how relationships are started. Among many findings, the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks, and when they believe that network members support their relationship. Additional topics discussed include how

this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships
