and even difficulty might also be important factors in successful transitions for others Handbook of Child Psychology. Theoretical Models of Human Development William Damon, Richard M. Lerner, 2006-05-19 Part of the authoritative four volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared Updated and revised to reflect the new developments in the field the Handbook of Child Psychology Sixth Edition contains new chapters on such topics as spirituality social understanding and non verbal communication Volume 1 Theoretical Models of Human Development edited by Richard M Lerner Tufts University explores a variety of theoretical approaches including life span life course theories socio culture theories structural theories object relations theories and diversity and development theories New chapters cover phenomenology and ecological systems theory positive youth development and religious and spiritual development *Older Widows and the Life Course* Pat Chambers, 2018-01-18 Later life widowhood is the expectation of most older wives since statistically women live longer than men and tend to marry men older than themselves Despite this there has been little coverage of the complexities of later life widowhood In this book Pat Chambers redresses this balance combining an analysis of the literature that does exist with qualitative research amongst older widows The research reveals a multi faceted experience of later life widowhood Older widows life stories challenge the dominant public narrative of misery and decline pointing instead to a complexity of experience which is rooted in personal biography and the female life course rather than in later life widowhood itself Chambers develops the concept of multiple narratives as a way of uncovering the complex but often hidden lives of older widows Without such an understanding she argues it is all too easy to subscribe to the powerfully dominant public narrative and thus to misinterpret older widows current needs and aspirations This is an engaging and original study of a key topic for gerontological research and will be of great interest to sociologists and social policy scholars who study ageing and the life course **Social Integration in the Second Half of Life** Karl Pillemer, Phyllis Moen, Elaine Wethington, Nina Glasgow, 2003-05-01 Social scientists use the term social integration to refer to individuals connections with others in their environments The concept and its consequences have been the subject of considerable study Many researchers have asserted that meaningful and enduring ties to other persons serve as a buffer against stress and thereby promote physical and mental health The results are especially pronounced for older persons Social Integration in the Second Half of Life presents integrative reviews of theory and research on this topic The editors and contributors all currently or previously affiliated with the Cornell Gerontology Research Institute also present new empirical findings of research done at their center The first section of the book discusses basic theory and principles of social integration in later life and its implications for health The second largest section examines specific issues retirement driving family support housing neighbors The third section addresses interventions to promote social integration transportation volunteering and peer support for dementia caregivers Throughout the authors focus on the diverging influences of social integration and its converse social isolation in later life
