Social Research on Children and Adolescents Barbara Stanley, Joan E. Sieber, 1991-10-31 A first in its field this timely volume effectively bridges the gap between the legal requirements that govern research on minors and the research methodology literature in adolescent psychology The editors skillfully bring together the insights of a group of leading researchers and scholars to address and resolve the following issues what theory and research on human development can tell researchers about adolescents vulnerability to several kinds of risk research and how to reduce that vulnerability what the law says about young peoples rights to privacy how the relevant ethical theory or guidelines should apply to minors approaching adulthood under what circumstances parental consent does not protect children s rights and how one explains the research process to a young adult Social Research on Children and Adolescents reaches a wide audience from professionals in development psychology family studies and education to researchers in evaluation research methods and sociology to students in the above fields all will undoubtedly benefit from this book Social Research on Children and Adolescents is an invaluable resource for researchers who confront questions such as how to assess risks and benefits within a developmental framework what legal constraints and ethical principles guide research practice and how to explain research participation to youth who differ greatly in their comprehension of the enterprise The major strength of this book aside from its effective integration of developmental theory and research ethics is the repeated examination of concrete research problems in light of ethical principles and legal requirements This book will be a useful addition to the library of any social scientist who conducts psychological research with children Death Studies **Ethical Issues in Mental Health**

Ethical Issues in Community-based Research with Children and Youth Bonnie J. Ross Leadbeater, Elizabeth Bannister, Cecilia Benoit, Anne Marshall, Mikael Jansson, Ted Riecken, 2006-01-01 Efforts to apply ethical guidelines and regulations to vulnerable populations are often problematic. Consequently, health and social scientists sometimes shy away from the challenges of research, particularly when it means addressing value-laden social problems such as sexuality, drugs, and racism. *Ethical Issues in Community Based Research with Children and Youth* is a collection of essays that describe the uniqueness of community-based research, outlining several of the ethical concerns that it engenders. The contributors examine such issues as the scope of informed consent to multiple stakeholders, determining competence to give consent in marginalized populations, and managing dual roles as participant-researchers. The collection suggests that a more collaborative, ongoing, and discursive approach is needed by researchers and by ethical review boards to ensure that research on sensitive social problems with high-risk populations is supported and also conducted with a clear understanding of the highest ethical standards possible.
