Milutinovic, 2019-12-12 Area Studies became increasingly common after World War II as a means of responding to perceived external threats from the Soviet Union and China After the Cold War and in the face of increasingly rapid globalisation it seemed inevitable that Area Studies institutionally and intellectually would slowly degenerate But this has not been the case and there has recently been a resurgence of interest in it as an effective and positive research paradigm Responding to this renewed interest this book brings together an esteemed group of contributors at the cutting edge of the field to consider the state of Area Studies today and its prospects for the future The Rebirth of Area Studies demonstrates that numerous aspects of the research paradigm in fact recommend it as well suited for the present moment and the challenges posed by globalisation both as a means to overcome disciplinary limitations and to increase self reflexivity Area Studies research is grounded in place specific knowledge yet by definition it transcends nation as the basic unit of analysis and thus empowers comparative and trans national approaches This book outlines a new critical Area Studies for the 21st century self reflexive aware of its limitations and conscious of its origins in geopolitical strategic or ideological considerations and is essential reading for historians geographers and political scientists **Quantum-Social Investigations across Transnational**

which has subsequently fallen out of favour A third section examines the intellectual debate over the welfare state since its creation in the 1940s Though a consensus seemed to have emerged during the Second World War over the desirability and scope of a welfare state extending from the cradle to the grave libertarian and conservative critiques endured and re emerged a generation later A final section examines social policy and its implementation more recently both at grass roots level in a study of community action in West London in the districts made infamous by the fire at Grenfell Tower in 2017 and at a systemic level where different models of welfare provision are shown to be in uneasy co existence today The collection is a tribute to Jose Harris emeritus professor of history in the University of Oxford and a pioneer of the intellectual history of social policy Taken together these essays conduct the reader through the key phases and debates in the history of British welfare
