A Treatise on Northern Ireland, Volume I Brendan O'Leary, 2019-04-11 This brilliantly innovative synthesis of narrative and analysis illuminates how British colonialism shaped the formation and political cultures of what became Northern Ireland and the Irish Free State A Treatise on Northern Ireland Volume I provides a somber and compelling comparative audit of the scale of recent conflict in Northern Ireland and explains its historical origins Contrasting colonial and sectarianized accounts of modern Irish history Brendan O Leary shows that a judicious meld of these perspectives provides a properly political account of direct and indirect rule and of administrative and settler colonialism The British state incorporated Ulster and Ireland into a deeply unequal Union after four reconquests over two centuries had successively defeated the Ulster Gaels the Catholic Confederates the Jacobites and the United Irishmen and their respective European allies Founded as a union of Protestants in Great Britain and Ireland rather than of the British and the Irish nations the colonial and sectarian Union was infamously punctured in the catastrophe of the Great Famine The subsequent mobilization of Irish nationalists and Ulster unionists and two republican insurrections amid the cataclysm and aftermath of World War I brought the now partly democratized Union to an unexpected end aside from a shrunken rump of British authority baptized as Northern Ireland Home rule would be granted to those who had claimed not to want it after having been refused to those who had ardently sought it The failure of possible federal reconstructions of the Union and the fateful partition of the island are explained and systematically compared with other British colonial partitions Northern Ireland was invented in accordance with British interests to resolve the hereditary animosities between the descendants of Irish natives and British settlers in Ireland In the long run the invention proved unfit for purpose Indispensable for explaining contemporary institutions and mentalities this volume clears the path for the intelligent reader determined to understand contemporary Northern Ireland

Bombardment, Public Safety and Resilience in English Coastal Communities during the First World War Michael Reeve, 2022-01-01 This book makes the case for a unique coastal urban experience of war on the home front during the First World War focusing on case studies from the north east of England The use of case studies from this region problematises an often assumed national or generalised experience of civilian life during the war by shifting the frame of analysis away from the metropolis This book begins with chapters related to wartime resilience including analysis of pre war fear of invasion and bombardment and government policy on public safety It then moves on to a discussion of power relations and the local implementation of policy related to bombardment including policing Finally the book explores the coastal urban environment focusing on depictions of war damage in popular culture and the wartime and post war commemoration of civilian bombardment This work provides a multi faceted perspective on civilian resilience while

responding to a recent call for new histories of the coastal zone

Agricultural and Pastoral Landscapes in

Pre-Industrial Society Fèlix Retamero, Inge Schjellerup, Althea Davies, 2014-12-01 Through a series of case studies this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre industrial communities in the construction of varied landscapes and cultural heritage Landnam from the Old Norse for taking of land deals with colonization including the drivers and processes through which colonizers developed an understanding of the productive potential and limitations of their new lands Fields and field systems Field walls are a distinctive and apparently timeless characteristic of many pre industrial farming landscapes but they present many the challenges to their study such as the effects of plowing abandonment and land use change and of urban development in fertile lowland zones which may eradicate reduce or conceal past systems of land use and division The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modeling approaches emphasized Agro pastoralism focuses on the complex time space adaptations devised for managing cultivation and livestock production particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources The contributions focus on mountainous areas where temporary migrations in the form of transhumance provided access to a diversity of resources based around seasonal constraints on their availability and productivity

Atlantic identity Its transnational approach challenges local and national narratives that have largely shaped previous investigations of these questions Kerr Ritchie shows how culture and community were truly political at this important historical moment and most broadly how politics and culture converge and profoundly influence each other Humanities, 1989
