War, Institutions, and Social Change in the Middle East Steven Heydemann, 2000-12-01 Few areas of the world have been as profoundly shaped by war as the Middle East in the twentieth century Despite the prominence of war making in this region there has been surprisingly little research investigating the effects of war as a social and political process in the Middle East To fill this gap *War Institutions and Social Change in the Middle East* brings together an international and interdisciplinary group of scholars who explore the role of war preparation and war making on the formation and transformation of states and societies in the contemporary Middle East Their findings pose significant challenges to widely accepted assumptions and present new theoretical starting points for the study of war and the state in the contemporary developing world Heydemann's collaborators include political scientists historians anthropologists and sociologists from the Middle East Europe and the United States Their essays are both theoretically sophisticated and empirically rich covering topics such as the effects of World War II on state market relations in Syria and Egypt the role of war in the rise of the Palestine Liberation Organization the political economy of Lebanese militias and the effects of the 1967 war on state and social institutions in Israel The volume originated as a research planning project of the Joint Committee on the Near and Middle East of the Social Science Research Council **Social Forces in the Middle East** Social Science Research Council (United States), 1968 **Regional Security in the Middle East** Pinar Bilgin, 2004-09-09 This is an accessible yet critical analysis of regional security in the Middle East Using a non realist approach Bilgin provides a comprehensive study of the past present and future of security in the region She also considers the question of identity formation explaining how and why various regional representations came into being and explor **Regional Security in the Middle East , Ethnicity, Pluralism, and the State in the Middle East** Milton J. toward the Middle East after World War II have begun to retire and unfortunately some have recently died To preserve their insights into the past and their visions of the future Thomas Naff asked a number of major Islamic and Middle East scholars to provide their perspectives and views in a short personal summation of their careers This book is a compilation of their responses It provides a unique evaluation of the last 30 or 40 years by ten of the most distinguished pioneers representing key branches of the field Pierre Cachia Albert Hourani J C Hurewitz Halil Inalcik Charles Issawi Ernest McCarus George Makdisi Don Peretz Dankwart A Rustow and Farhat J Ziadeh have provided their perspectives on the past and present their visions of future paths to be explored and their wisdom drawn from decades of experience and scholarship Whatever didacticism is offered in this book is not formal Lessons insights wisdom and inspiration are almost invisibly woven into the fabric of fascinating biographical narrative told with wit style self effacement and candor **Social Forces in the Middle**

East Sydney N. Fisher,1955 **The Geography of the Middle East** Stephen H. Longrigg,James Jankowski,2017-09-04

Much of the Middle East is in a continuing state of visible often revolutionary change in almost every field social cultural economic political Although time will have greatly modified the conditions here presented the author emphasizes those aspects which being the least ephemeral were likely to remain valid for some years and indicates the areas in which the most change can be expected Therefore in evaluating any change that has occurred the reader will at least be informed of the conditions out of which or because of which such an event occurred In some cases Longrigg passes over important aspects of the Middle Eastern region and its component countries almost or entirely in silence among such aspects being those of military resources prominent personalities constitutional or legal issues budgets and balances of trade And even on matters upon which he has said something fairly specific topography races and languages religions climates natural resources and agronomy industry communications there may be too little detailed information to satisfy a reader desirous of a full picture of a given aspect of things in this or that territory For most of such detail and not less for an appreciation which may be widely different from the author s the student can very easily look elsewhere the literature of these countries is abundant and accessible Longrigg s attempt has been to offer an objective but informed account of the different nationalities and social forces found in Middle Eastern environments urban and rural in terms of the particular circumstances problems and hopes of the dozen separate and more or less divided states of the region The non specialist reader may from all this learn something true and perhaps suggestive while the expert may find not too much to offend him *The International Relations of the Contemporary Middle East* Tareq Y. Ismael,Glenn E. Perry,2013-10-01 The Middle East a few decades ago was seen to be an autonomous subsystem of the global international political system More recently the region has been subordinated to the hegemony of a singular superpower the US bolstered by an alliance with Israel and a network of Arab client states The subordination of the contemporary Middle East has resulted in large part from the disappearance of countervailing forces for example global bipolarity that for a while allowed the Arab world in particular to exercise a modicum of flexibility in shaping

its international relations The aspirations of the indigenous population of the Middle East have been stifled by the dynamics of the unequal global power relationships and domestic politics of the countries of the region are regularly subordinated to the prerogatives of international markets and the strategic competition of the great powers Employing the concept of imperialism defined as a pattern of alliances between a center rulers in the Center developed country and a center client regime in the Periphery underdeveloped country as an overall framework to analyse the subordination of the region this book is essential reading for students and scholars of the Middle East International Relations and Politics in general

Conflict in the Middle East P.J. Vatikiotis,2016-07-22 The Middle East is a continuing crisis area in world politics This crisp and penetrating book first published in 1971 analyses the historical development of the major issues in Arab politics explains the conflicting interests now at stake in the Middle East and how the politics of the area were likely to develop It examines among other topics the Palestine Liberation Movement the prospects for Arab unity and Great Power interference and was written by one of the world s leading scholars writing on the Middle East

The Middle East Peter Beaumont,Gerald Blake,J. Malcolm Wagstaff,2016-04-14 This book first published in 1976 and in this second edition in 1988 combines an examination of the political cultural and economic geography of the Middle East with a detailed study of the region s landscape features natural resources environmental conditions and ecological evolution The Middle East with its extremes of climate and terrain has long fascinated those interested in the fine balance between man and his environment and now its economic and political importance in world affairs has brought the region to the attention of everybody

The New Authoritarianism in the Middle East and North Africa Stephen J. King,2009-10-28 Ultimately King s forward thinking analysis offers a way to enhance the prospects for democracy in the Middle East and North Africa

Routledge Handbook of Minorities in the Middle East Paul S Rowe,2018-09-20 The Routledge Handbook of Minorities in the Middle East gathers a diverse team of international scholars each of whom provides unique expertise into the status and prospects of minority populations in the region The dramatic events of the past decade from the Arab Spring protests to the rise of the Islamic state have brought the status of these populations onto centre stage The overturn of various long term autocratic governments in states such as Tunisia Egypt Libya and Yemen and the ongoing threat to government stability in Syria Iraq and Lebanon have all contributed to a new assertion of majoritarian politics amid demands for democratization and regime change In the midst of the dramatic changes and latent armed conflict minority populations have been targeted marginalized and victimized Calls for social and political change have led many to contemplate the ways in which citizenship and governance may be changed to accommodate minorities or indeed if such change is possible At a time when the survival of minority populations and the utility of the label minority has been challenged this handbook answers the following set of research questions What are the unique challenges of minority populations in the Middle East How do minority populations integrate into their host societies both as a function of their own internal choices and as a response to majoritarian consensus

on their status Finally given their inherent challenges and the vast sweeping changes that have taken place in the region over the past decade what is the future of these minority populations What impact have minority populations had on their societies and to what extent will they remain prominent actors in their respective settings This handbook presents leading edge research on a wide variety of religious ethnic and other minority populations By reclaiming the notion of minorities in Middle Eastern settings we seek to highlight the agency of minority communities in defining their past present and future
