## **Social Movements And Economic Transition:**

**Social Movements and Economic Transition** Heather L. Williams, 2001-01-15 This book examines patterns of political mobilization among groups in Mexico whose livelihoods have been threatened by trade opening, fiscal retrenchment and market liberalization. Using data from case studies of a worker based movement and a farmer based movement, Williams argues that economic transition in altering modes of state-society bargaining has shifted the locus of contention and has altered the form and shape of distributive protest. Williams further argues that social movements make strategic choices in their use of resources in order to widen their constituencies and extend the length of their insurgencies. Social Movements and the Change of Economic Elites in Europe after 1945 Stefan Berger, Marcel Boldorf, 2018-05-29 This book explores the changing nature of social movements and economic elites in post-Second World War Europe. In the years following 1945, Europe faced diverse challenges connected by the overriding question of how the reconstruction of the continent should proceed. For the Central Powers, the implementation lay in the hands of the Allied occupying forces who organised the process of denazification and the establishment of a new economic order. In countries without military occupation, there was a deep gap between the new governmental forces and the former collaborators. In both cases, social movements which were formed by anti-fascists on the left of the political spectrum assumed the task of social reorganisation. The chapters in this book explore the discourses about economic systems and their elites which moved to the fore across a range of European countries, uncovering who was involved, what resistance these social movements faced, and how these ultimately failed in the West to bring about change, while in Eastern Europe, Stalinism forcibly imposed change. **SOCIAL AND ECONOMIC DEVELOPMENT - Volume III** Salustiano del Campo, Tomoko Hamada, Giancarlo Barbiroli, Saskia Sassen, Eleonora Barbieri-Masini, Paul Nchoji Nkwi, Owen Sichone, Abubakar Momoh, 2010-11-15 Social and Economic Development is a component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. **South Korean Social Movements** Gi-Wook Shin, Paul Y Chang, 2011-06-01 This book explores the evolution of social movements in South Korea by focusing on how they have become institutionalized and diffused in the democratic period The contributors explore the transformation of Korean social movements from the democracy campaigns of the 1970s and 1980s to the rise of civil society struggles after 1987 South Korea was ruled by successive authoritarian regimes from 1948 to 1987 when the government decided to re-establish direct presidential elections The book contends that the transition to a democratic government was motivated in part by the pressure from social movement groups that fought the state to bring about such democracy After the transition however the movement groups found themselves in a qualitatively different political context which in turn galvanized the evolution of the social movement sector Including an impressive array of case studies ranging from the women's movement to environmental NGOs and from cultural production to law the contributors to this book enrich our understanding of the democratization process in Korea and show that the social movement sector remains an important player in Korean politics today This book will appeal to students and scholars of Korean studies Asian politics political history and social movements

**Social Conflict, Economic Development and Extractive Industry** Anthony Bebbington,2011-09-27 The extraction of minerals oil and gas has a long and ambiguous history in development processes in North America Europe Latin America and Australasia Extraction has yielded wealth regional identities and in some cases capital for industrialization In other cases its main heritages have been social conflict environmental damage and underperforming national economies As the extractive economy has entered another boom period over the last decade not least in Latin America the countries in which this boom is occurring are challenged to interpret this ambiguity Will the extractive industry yield for them economic development or will its main gifts be ones of conflict degradation and unequal forms of growth This book speaks directly to this question and to the different ways in which Latin American countries are responding to the challenge of extractive industry The contributors are a mixture of geographers economists political scientists development experts and anthropologists who all draw on sustained field work in the region By digging deep into both national and local experiences with extractive industry they demonstrate the ways in which it transforms economies

societies politics and environments They pay particular attention to the social conflict that extraction consistently produces and they ask how far this conflict might usher in political and institutional changes that could lead to a more productive relationship between extraction and development They also ask whether the existence of left of centre governments in the region changes the relationships between extractive industry and development The book makes clear the immense difficulties that countries and regional societies face in harnessing extractive industry for the collective good For the most part the findings question the wisdom of the development model that many countries in the region have taken up and which emphasises the productive roles of mining and hydrocarbon industries The book should be of interest to students and researchers of Development Studies Geography Politics and Political Economy as well as Anthropology

**Social Conflict, Economic Development and the Extractive Industry** Anthony Bebbington, 2011-09-27 This multidisciplinary book offers a comparative reading of the conflicts between large mining industries and peasant and indigenous communities in Peru Bolivia and Ecuador focusing on the wider political economy of extractives in Latin America
