imperfections its enduring challenges and its strengths      *Bridging the 'Know-Do' Gap* Gabriele Bammer, Annette Michaux, Ann Sanson, 2010-08-01 Today's children are tomorrow's citizens Good health and well being in the early years are the foundations for well adjusted and productive adult lives and a thriving society But children are being let down in Australia and elsewhere by the lack of knowledge transfer between the worlds of research policy and practice Improving such transfer is the job of knowledge brokers the various ways they can operate are explored in this book through case examples and the lessons learned from experienced proponents The book concludes by posing three sets of ideas to shape the future of knowledge brokering      *Policy Sectors in Comparative Policy Analysis Studies* Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-09 Volume Four of the Classics of Comparative Policy Analysis Policy Sectors in Comparative Policy Analysis Studies contains chapters concerned with comparison within disciplinary policy sectors The volume contains detailed analyses of policies within six major policy sectors and illustrates the important differences that exist across policies healthcare environment education social welfare immigration and science and technology The reader will find some common aspects and dimensions theoretical or methodological across all policy domains as well as differences dictated by the characteristics of the discipline or the locus in which the policy point at issue takes place Indeed some scholars have argued that the differences and similarities that exist across and within policy sectors can transcend the differences or similarities across political systems Policy Sectors in Comparative Policy Analysis Studies will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be reliably contextualized learned facilitated or avoided through lesson drawing The chapters were originally published as articles in the Journal of Comparative Policy Analysis which in the last two decades has pioneered the development of comparative public policy The volume is part of a four volume series the Classics of Comparative Policy Analysis including Theories and Methods Institutions and Governance Regional Comparisons and Policy Sectors Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy political science public administration governance and policy design authored by the JCPA authored by the JCPA co editors Giliberto Capano Michael Howlett Leslie A Pal and B Guy Peters      **Understanding Social Problems, Policies, and Programs** Leon H. Powell, Jon Hendricks, 2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations NGOs and other international

organizations have begun to influence social policy at a national and local level. Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level. With contributions from thirteen countries worldwide, this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state. *The Welfare State in Post Industrial Society* is divided into two major sections: the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions. The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship, ageing, and marketization. *The Welfare State in Post Industrial Society* seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations.

**Regional Comparisons in Comparative Policy Analysis Studies** Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-29. Volume Three of the *Classics of Comparative Policy Analysis* contains chapters concerned with Regional Comparisons and Policy Analysis, one of the most prevailing approaches in comparative public policy. Through the prism of inter-jurisdiction comparisons of similarities and variations, they address comparisons in specific policy sectors, governance, or institutional constructs and political regimes. The foci are nevertheless on those comparisons between countries or regions which help to learn by identifying and understanding the variation in policy analysis and policy making that exists within or across regions. One benefit of regional comparisons is that it often allows studies to hold constant many variables ranging from colonial legacy to federal systems or from language to specific traditions and more effectively isolate dependent variables. Regional organizations like the Organization for Economic Co-operation and Development (OECD) or European Union are also considered as catalysts for regional policy approaches and harmonization and occupy a major role in this volume. The chapters address a broad and diverse number of countries and geographical areas: Latin America, North America, East Asia, Southeast Asia, Southern Africa, the Baltic states, the Nordic states, Western Europe, Central Europe, Eastern Europe, and Europe as a whole. *Regional Comparisons and Policy Analysis* will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be learned or facilitated through methodologically and theoretically sound approaches. The chapters were originally published as articles in the *Journal of Comparative Policy Analysis*, which in the last two decades has pioneered the development of comparative public policy. The volume is part of a four-volume series, the *Classics of Comparative Policy Analysis*, including *Theories and Methods*, *Institutions and Governance*, *Regional Comparisons and Policy Sectors*. Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy: political science, public administration, governance, and policy design, authored by the JCPA co-editors Giliberto Capano, Iris Geva-May, Michael
