

SOCIAL PSYCHOLOGY

Social psychology explores how humans are fundamentally social beings. It explores how sociality affects our behaviors and values.

INTERESTING QUOTE

"Basic questions about social behavior go back to the ancients. Are men and women capable of governing themselves? Is their behavior governed by internal dispositions or the requirements of society and culture? Should we be optimistic or pessimistic about human potential and human performance? Are people rational or irrational?" (p. 19)

A Historical Archaeology of the Modern World Charles E. Orser Jr.,2013-06-29 This unique book offers a theoretical framework for historical archaeology that explicitly relies on network theory Charles E Orser Jr demonstrates the need to examine the impact of colonialism Eurocentrism capitalism and modernity on all archaeological sites inhabited after

1492 and shows how these large scale forces create a link among all the sites Orser investigates the connections between a seventeenth century runaway slave kingdom in Palmares Brazil and an early nineteenth century peasant village in central Ireland Studying artifacts landscapes and social inequalities in these two vastly different cultures the author explores how the archaeology of fugitive Brazilian slaves and poor Irish farmers illustrates his theoretical concepts His research underscores how network theory is largely unknown in historical archaeology and how few historical archaeologists apply a global perspective in their studies A Historical Archaeology of the Modern World features data and illustrations from two previously unknown sites and includes such intriguing findings as the provenance of ancient Brazilian smoking pipes that will be new to historical archaeologists *Public Opinion Polling in Mid-Century British Literature* Megan Faragher, 2021-08-19 Whereas modernist writers lauded the consecrated realm of subjective interiority mid century writers were engrossed by the materialization of the collective mind An obsession with group thinking was fuelled by the establishment of academic sociology and the ubiquitous infiltration of public opinion research into a bevy of cultural and governmental institutions As authors witnessed the materialization of the once opaque realm of public consciousness for the first time their writings imagined the potentialities of such technologies for the body politic Polling opened new horizons for mass politics *Public Opinion Polling in Mid Century British Literature* traces this most crucial period of group psychology s evolution the mid century when psychography a term originating in Victorian spiritualism transformed into a scientific praxis The imbrication of British writers within a growing institutionalized public opinion infrastructure bolstered an aesthetic turn towards collectivity and an interest in the political ramifications of meta psychological discourse Examining works by H G Wells Evelyn Waugh Val Gielgud Olaf Stapledon Virginia Woolf Naomi Mitchison Celia Fremlin Cecil Day Lewis and Elizabeth Bowen this book utilizes extensive archival research to trace the embeddedness of writers within public opinion institutions providing a fresh explanation for the new material turn so often associated with interwar writing *Attracted to Conflict: Dynamic Foundations of Destructive Social Relations* Robin R. Vallacher, Peter T. Coleman, Andrzej Nowak, Lan Bui-Wrzosinska, Larry Liebovitch, Katharina Kugler, Andrea Bartoli, 2014-07-08 Conflict is inherent in virtually every aspect of human relations from sport to parliamentary democracy from fashion in the arts to paradigmatic challenges in the sciences and from economic activity to intimate relationships Yet it can become among the most serious social problems humans face when it loses its constructive features and becomes protracted over time with no obvious means of resolution This book addresses the subject of intractable social conflict from a new vantage point Here these types of conflict represent self organizing phenomena emerging quite naturally from the ongoing dynamics in human interaction at any scale from the interpersonal to the international Using the universal language and computational framework of nonlinear dynamical systems theory in combination with recent insights from social psychology intractable conflict is understood as a system locked in special attractor states that constrain the thoughts and actions of the parties to the conflict The emergence and maintenance

of attractors for conflict can be described by means of formal models that incorporate the results of computer simulations experiments field research and archival analyses Multi disciplinary research reflecting these approaches provides encouraging support for the dynamical systems perspective Importantly this text presents new views on conflict resolution In contrast to traditional approaches that tend to focus on basic short lived cause effect relations the dynamical perspective emphasizes the temporal patterns and potential for emergence in destructive relations Attractor deconstruction entails restoring complexity to a conflict scenario by isolating elements or changing the feedback loops among them The creation of a latent attractor trades on the tendency toward multi stability in dynamical systems and entails the consolidation of incongruent positive elements into a coherent structure In the bifurcation scenario factors are identified that can change the number and types of attractors in a conflict scenario The implementation of these strategies may hold the key to unlocking intractable conflict creating the potential for constructive social relations
