**Transnational Social Work Practice** Nalini Junko Negi, Rich Furman, 2010-09-29. A growing number of people, immigrants, refugees, asylum seekers, displaced individuals, and families lead lives that transcend national boundaries. Often because of economic pressures, these individuals continually move through places, countries, and cultures, becoming exposed to unique risk and protective factors. Though migration itself has existed for centuries, the availability of fast and cheap transportation, as well as today's sophisticated technologies and electronic communications, have allowed transmigrants to develop transnational identities and relationships, as well as engage in transnational activities. Yet despite this new reality, social work has yet to establish the parameters of a transnational social work practice. In one of the first volumes to address social work practice with this emergent and often marginalized population, practitioners and scholars specializing in transnational issues develop a framework for transnational social work practice. They begin with the historical and environmental context of transnational practice and explore the psychosocial, economic, environmental, and political factors that affect at-risk and vulnerable transnational groups. They then detail practical strategies, supplemented with case examples for working with transnational populations, utilizing this population's existing strengths. They conclude with recommendations for incorporating transnational social work into the curriculum.

Demonstrating how the COVID-19 pandemic exposed and intensified inequities, as well as ways in which social workers responded to the needs of their clients, organizations, and communities. Updating language to reflect commitment to and respect for inclusivity, gender identity, and non-gendered identities. Dente, 2018-10-11 Social Work Practice with LGBTQIA Populations provides an overview of key issues for social workers working with LGBTQIA clients. Each chapter considers clients' experiences in different social and interpersonal contexts. This text encourages students to think critically about the barriers and discriminations clients might face in their lives and how social workers can be equipped to address these issues. Students are challenged to develop approaches that extend support to these clients and that remove structural barriers that clients face within the systems they encounter. Utilizing intersectionality theory, students will gain an understanding of the risks and protective factors unique to this population in social work contexts      **Social Work Practice with Immigrants and Refugees** Pallassana R. Balgopal, 2000 Includes statistics      Social Work and Migration Kathleen Valtonen, 2016-04-01 Social work increasingly finds itself at the frontline of issues pertaining to immigrant and refugee settlement and integration. In this timely book, Kathleen Valtonen provides the first book-length study on the challenges these issues create for the profession. Drawing on a wide range of research in migration which is not widely available to social workers or included in social work literature, she offers readers an opportunity to explore the capacity of the profession to take a primary role in the course and outcome of settlement. The book fills a gap in the social work literature by providing scholars, practitioners, and students with a critical knowledge base that will strengthen their ability to engage with issues of immigration and integration and to open up options for effective practice with growing numbers of immigrant and refugee clients.
