of Marx and Engels socialist theories for contemporary social development in the Eastern societies is henceforth laid bare The book will be a key reference for readers studying Marxism Marxist philosophy and the history of philosophy *The Last Civilization* Charles Brough,2010-11 The terrorism continues with no end in sight over population grows ever more serious our natural resources are being depleted and corruption runs rampant Will these problems ever be solved The continuing events point to an impending breakdown of our civilization The threat of a new world wide plague mass starvation and nuclear war increases each year No solution is in sight without an understanding of social evolutionary natural selection and how it has shaped world affairs throughout both history and prehistory Only by learning how ideology shapes society is it possible to know what must happen in order for people to be active in the transition from the old into a new society and civilization The author covers topics such as our primate small group social behavior the development of the matriarchal agricultural ideological system the ideology involved in barbarism and the rise of the patriarchal monogamous ideologically based societies and their civilizations Learn why the green revolution is falling behind the biologically related build up of stress and how lagging energy supplies will affect the world Two of the last chapters lay out the structural make up of every successful mainstream world view ideological system They use that to build a facsimile of what the core of such a new and advanced system would have to be like to succeed a perpetual lack of which would ensure that this is indeed The Last Civilization because no other can follow without it *Civilizations in World Politics* Peter J. Katzenstein,2009-09-10 A highly original and readily accessible examination of the cultural dimension of international politics this book provides a sophisticated and nuanced account of the relevance of cultural categories for the analysis of world politics The book s analytical focus is on plural and pluralist civilizations Civilizations exist in the plural within one civilization of modernity and they are internally pluralist rather than unitary The existence of plural and pluralist civilizations is reflected in transcivilizational engagements intercivilizational encounters and only occasionally in civilizational clashes Drawing on the work of Eisenstadt Collins and Elias Katzenstein s introduction provides a cogent and detailed alternative to Huntington s This perspective is then developed and explored through six outstanding case studies written by leading experts in their fields Combining contemporary and historical perspectives while addressing the civilizational politics of America Europe China Japan India and Islam the book draws these discussions together in Patrick Jackson s theoretically informed thematic conclusion Featuring an exceptional line up and representing a diversity of theoretical views within one integrative perspective this work will be of interest to all scholars and students of international relations sociology and political science
