Sociobiology And The Preemption Of Social Science:

Sociobiology and the Preemption of Social Science Alexander Rosenberg, 2019-12-01 Although largely conceptual the book is an unequivocal defense of this new theory in the explanation of human behavior

Philosophy Of Social Science Alexander Rosenberg, 1988-09-18 This is an expanded and thoroughly revised edition of the widely adopted introduction to the philosophical foundations of the human sciences Ranging from cultural anthropology to mathematical economics Alexander Rosenberg leads the reader through behaviorism naturalism interpretativism about human action and macrosocial scientific perspectives illuminating the motivation and strategy of each Rewritten throughout to increase accessibility this new edition retains the remarkable achievement of revealing the social sciences enduring relation to the fundamental problems of philosophy It includes new discussions of positivism European philosophy of history causation statistical laws quantitative models and postempiricist social science along with a completely updated literature guide that keys chapters to widely anthologized papers

Biopolitics and Gender Meredith W Watts Jr, 2012-12-06 Here is an important book for social scientists interested in the influence of gender on certain types of behavior Several perspectives are presented on the general topic of biopolitics and gender including the points of view of brain science endocrinology ethology psychophysiology and such conventional interests as political attitudes socialization participation social structure and political hierarchy The varied and provocative ideas explored in this volume will broaden discussions of gender beyond an exclusive focus on sex links to oppression and discrimination

Encyclopedia of Philosophy and the Social Sciences Byron Kaldis, 2013-04-02 The entries in this encyclopedia give readers an opportunity to explore interconnections clarify commonalities as well as differences or comparative contrasts discover new fields or ideas of intellectual interest explore adjacent conceptual zones that may be found to further expand their own disciplinary domains and also understand better their own academic areas of expertise and the historical provenance of each p xxxi

Measuring the Intentional World J. D. Trout, 2003 Scientific realism has been advanced as an interpretation of the natural sciences but never the behavioral sciences This exciting book introduces a novel version of scientific realism Measured Realism that characterizes the kind of theoretical progress in the social and psychological sciences that is uneven but indisputable Trout proposes a theory of measurement Population Guided Estimation that connects natural psychological and social scientific inquiry Presenting quantitative methods in the behavioral sciences as at once successful and regulated by the world Measuring the Intentional World will engage philosophers of science historians of science sociologists of science and scientists interested in the foundations of their own disciplines

Economic Objects and the Objects of Economics Peter Róna, László Zsolnai, 2018-08-21 This book examines the nature of economic objects that form the subject matter of economics and studies how they resemble or differ from the objects studied by the natural sciences It explores the question of whether economic objects created by modern economics sufficiently represent economic reality and confronts the question whether tools

techniques and the methodology borrowed from the natural sciences are appropriate for the analysis of economic reality It demonstrates the unsustainability of rational choice theory It looks at economic agents such as individuals groups legally constituted entities algorithms or robots how they function and how they are represented in economics The volume further examines the extent if any that mathematics can represent the objects of the economy such as supply and demand equilibrium marginal utility or the money supply as they actually occur in the economy and as they are represented in economics Finally the volume explores whether the subject matter of economics however defined is the proper subject of theoretical knowledge whether economics is an analytic or a descriptive discipline or if it is more properly seen in the domain of practical reason Specifically the book looks at the importance and the ambiguity of the ontology of modern economics temporality reflexivity the question of incommensurability and their implications for economic policy Evolutionary Ecology and Human Behavior Eric Alden Smith,2017-09-29 required reading for anyone interested in the economy ecology and demography of human societies American Journal of Human Biology This excellent book can serve both as a text1 4book and as a scholarly reference American Scientist **Theories, Models and Concepts in Ancient History** Neville Morley,2004-06-01 Morley s book offers the first accessible guide for students to show how theories models and concepts have been applied to ancient history Showing readers how they can use theory to interpret historical evidence for themselves as well as to evaluate the work of others the book includes a survey of key ideas and theories on a wide range of ancient historical topics including society and economy the environment gender and sexuality and myth and rationality Also including a helpful annotated guide to further reading on all the topics covered students will not want to miss out on this essential guide to the ancient world **Religion and Cognition** D. Jason Slone,2016-04-01 The cognitive science of religion examines the mental processes that govern religious belief and behaviour It offers a fresh and exciting approach to the scientific study of religion Religion and Cognition brings together key essays which outline the theory and illustrate this with experimental case material The central topics in this new critical field of research are all addressed meta theoretical arguments for cognitive explanations of religion theoretical models of cognition employed in the cognitive science of religion prominent cognitive theories of religion methods used to gather data and test theories and experimental findings by cognitive scientists of religion **Economic Methodology and Freedom to Choose (Routledge Revivals)** Patrick O'Sullivan,2012-07-26 First published in 1987 Professor O Sullivan s work provides an in depth philosophical examination of the foundations of method in Economics and other human sciences The argument is unabashedly dialectical in the great Socratic Platonic tradition and the reissue will be very welcome to all students of methodology in particular those students of economic methodology seeking a refreshing alternative to yet more mathematical game playing In an age dominated and perhaps to an extent perplexed by an ultimately non committal postmodernism the book provides a root and branch critique of the epistemological relativism which must lie at the root of the whole post modernist approach and in reasserting the

fundamental importance not only for the methods of science but also for European civilisation of the pursuit of truth it takes a stance which is very much against the tide of the times A heterodox perspective is also provided and defended in detail regarding the real nature of economic methodology whereby it is shown that Economics epitomises a teleological mode of explanation which is significantly different from the efficient causal modes of explanation of the natural sciences In fact Economics is the ultimate subjectivist interpretative discipline in the methodological sense of Max Weber and Alfred Schutz a fact which has only been recognised and welcomed in the Austrian school of Economics

Field Hospital William T. Cavanaugh, 2016 Compelling social perspectives from a prominent Catholic scholar Pope Francis in a 2013 interview famously likened the church to a field hospital In this book William Cavanaugh adopts Pope Francis's metaphor to show how the church can help heal both the spiritual and the material wounds of the world As he examines the intersection of theology with themes of religious freedom economic injustice religious violence and other pressing topics Cavanaugh emphasizes that the church cannot condemn the evils of the world from a position of superiority Rather he says its practices of solidarity with humanity must be based on a profound recognition that the church shares in the guilt of human sin Cavanaugh's Field Hospital provides guideposts for a church that is willing to go outside of itself onto today's battlefields both metaphorical and literal not to inflict wounds but to bind them up and heal them

Political Philosophy Mario Bunge, 2017-07-12 Political philosophy is not a well defined field It hovers between political theory and classical philosophy Few early political thinkers could have anticipated the most pressing political issues of our time the need to stop global warming the reduction of nuclear armaments the rise of inequality between individuals and nations and the struggle against authoritarianism particularly when it comes disguised as democracy or as socialism Here celebrated philosopher Mario Bunge masterfully integrates socio political theory into a philosophical exploration of power and resource distribution in the world today Bunge contends that even recent political thinkers have generally failed to address the political underpinnings of topical issues Environmental degradation gender and race discriminations participative democracy nationalism imperialism the North South divide resource wars and the industrial military complex have all largely been bypassed in political thinking Even connections between poverty and environmental degradation and between inequality and bad health have escaped the attention of those who would call themselves political thinkers Bunge believes that political philosophers should pay more attention to social indicators such as the standard index of income inequality and the United Nations human development index It is pointless to write about redistributive policies unless we have a shared understanding of current wealth distribution This is in short a modern treatise on sociopolitical concerns

Signifying Animals Roy Willis, 2003-09-02 A fresh assessment of the workings of animal symbolism in diverse cultures Reconsiders the concept of totemism and exposes common fallacies in symbolic interpretation

Model Systems in Behavioral Ecology Lee Alan Dugatkin, 2001-10-07 A key way that behavioral ecologists develop general theories of animal behavior is by studying one species or a closely related group of species model systems over a long period This book brings together some of the field's most respected researchers to describe why they chose their systems how they integrate theoretical conceptual and empirical work lessons for the practice of the discipline and potential avenues of future research Their model systems encompass a wide range of animals and behavioral issues from dung flies to sticklebacks dolphins to African wild dogs from foraging to aggression territoriality to reproductive suppression *Model Systems in Behavioral Ecology* offers an unprecedented systems focus and revealing insights into the confluence of personal curiosity and scientific inquiry It will be an invaluable text for behavioral ecology courses and a helpful overview and a preview of coming developments for advanced researchers The twenty five chapters are divided into four sections insects and arachnids amphibians and reptiles birds and mammals In addition to the editor the contributors include Geoff A Parker Thomas D Seeley Naomi Pierce Kern Reeve Gerald S Wilkinson Bert H Ildobler and Flavio Roces George W Uetz Michael J Ryan and Gil Rosenthal Judy Stamps H Carl Gerhardt Barry Sinervo Robert Warner Manfred Milinski David F Westneat Alan C Kamil and Alan B Bond Paul Sherman Jerram L Brown Anders Pape M ller Marc Bekoff Richard C Connor Joan B Silk Christopher Boesch Scott Creel A H Harcourt and Tim Caro and M J Kelly
