Sociology and Social Research (RLE Social Theory) Geoff Payne, Robert Dingwall, Judy Payne, Mick Carter, 2014-08-21 A social science which has become so remote from the society which pays for its upkeep is ultimately doomed threatened less by repression than by intellectual contempt and financial neglect This is the message of the authors of this book in this reassessment of the

evolution and present state of British sociology Their investigation analyses the discipline as a social institution whose product is inexorably shaped by the everyday circumstances of its producers it is the concrete outcome of people s work rather than a body of abstract ideas Drawing upon their varied experience as teachers and researchers they identify three major trends in contemporary sociology First that the discipline s rapid expansion has led to a retreat from rigorous research into Utopian and introspective theorising Second that the concept of sociological research is being taught in a totally false way because of this and encourages research within a wholly academic environment Third that the current unpopularity of sociology with academics prospective students and politicians is no coincidence but a reflection of the conditions under which sociology is now produced and practised In *Sociology and Social Research* the authors suggest substantial changes in sociological research the way in which it is carried out and the conditions under which it is undertaken Their book is a timely warning to fellow sociologists when the profession is under attack as a result of public expenditure cuts

Sociology, Capitalism, Critique Hartmut Rosa, Stephan Lessenich, Klaus

Dörre, 2015-05-26 Three radical perspectives on the critique of capitalism For years the critique of capitalism was lost from public discourse the very word capitalism sounded like a throwback to another era Nothing could be further from the truth today In this new intellectual atmosphere Sociology Capitalism Critique is a contribution to the renewal of critical sociology founded on an empirically grounded diagnosis of society's ills The authors Germany's leading critical sociologists Klaus Dörre Stephan Lessenich and Hartmut Rosa share a conviction that ours is a pivotal period of renewal in which the collective endeavour of academics can amount to an act of intellectual resistance working to prevent any regressive development that might return us to neoliberal domination The authors discuss key issues such as questions of accumulation and expropriation discipline and freedom and the powerful new concepts of activation and acceleration Their politically committed sociology which takes the side of the losers in the current crisis places society's future well being at the centre of their research Their collective approach to this project is a conscious effort to avoid co-optation in the institutional practices of the academy These three differing but complementary perspectives serve as an insightful introduction to the contemporary themes of radical sociology in capitalism's post crisis phase
