The Family in Global Perspective Elaine J. Leeder, 2004 The Family in Global Perspective is an exciting new cross cultural text that should be adopted for classroom use in universities nationwide Elaine Leeder has created a readable interesting textbook for undergraduates that reveals the historical socio cultural and gender realities of family life Real life examples from 42 countries support student understandings of sociological theory and build a comprehensive awareness of family as a way of being for people throughout the world Peter Phillips Sonoma State University I think it would be a great book for a class in Family Studies In the Family Studies field we have come to realize that the family as we see it is not how peoples of the world necessarily see it I think exposing all Family Studies students to this text would greatly enhance their educational development written in very comprehensible language for undergraduates Yvonne M Caldera Ph D Texas Tech University I find the book overall is well done it is very readable for undergraduates the author is good at interweaving interesting research and travel notes with theories and discussions about families in a global perspective in various places The style is refreshing particularly enticing for undergraduate readers Heying Jenny Zahn Georgia State University The book is rather unique in the sense that there are few works that place the U S family within a larger global framework The comparisons that are made across societies serve to enhance understanding of family patterns in the United States I also should mention that the book is well written and in an interesting way too It successfully combines important academic material with a thought provoking style of presentation Sharon K Houseknecht Ohio State University What is a family In the context of biology the answer may be fairly simple However in the social context the family is a far more complex form with a meaning that is multilayered The Family in Global Perspective A Gendered Journey examines the continually changing face of family life in the United States and from culture to culture Written in an engaging style the book provides a global viewpoint about family issues enabling readers to think critically about family life in cultures beyond their own In The Family in Global Perspective author Elaine Leeder uses various historical theoretical and comparative perspectives to develop a cross cultural

understanding of family life The book examines a variety of family lives in western countries and contrasts them with those of families in parts of Africa Asia and Latin America After comparing the history of the family in various parts of the globe the author then looks at the impact of globalization on family structures gendered behavior intergenerational relationships relationship dissolution race ethnicity and class issues violence and social policy Features of this text Expresses a feminist view of family life and includes case examples from the author's own experiences visiting and studying families in 42 countries Organized topically rather than by country or culture to facilitate instruction on a particular component of family life Pedagogical features such as an accessible format chapter introductions vignettes and photos highlighted key terms and chapter summaries enhance students understanding The Family in Global Perspective is an ideal supplementary textbook for courses on marriage and the family in a variety of disciplines including Family Studies Sociology Social Work Psychology and Women's Studies

Critical Global Perspectives Binaya Subedi, 2010-03-01 The primary purpose of this book is to invite educators to re-think what it means to critically conceptualize knowledge about the world In other words imagining curriculum in a critical way means decolonizing mainstream knowledge about global societies Such an approach re-evaluates how we have come to know the world and asks us to consider the socio-political context in which we have come to understand what constitutes an ethical global imagination A critical reading of the world calls for the need to examine alternative ways of knowing and teaching about the world a pedagogy that recognizes how diverse subjects have come to view the world A critical question this book raises is What are the radical ways of re-conceptualizing curriculum knowledge about global societies so that we can become accountable to the different ways people have come to experience the world Another question the book raises is how do we engage with complexities surrounding social differences such as gender race ethnicity religion etc in the global contexts Analyzing global issues and events through the prism of social difference opens up spaces to advocate a transformative framework for a global education curriculum Transformative in the sense that such a curriculum asks students to challenge stereotypes and engages students in advocating changes within local global contexts A critical global perspective advocates the value of going beyond the nation state centered approach to teaching about topics such as history politics culture etc It calls for the need to develop curriculum that accounts for transnational formations an intervention that asks us to go beyond issues that are confined within national borders Such a practice recognizes the complicated ways the local is connected to the global and vice versa and cautions against creating a hierarchy between national and global issues It also suggests the need to critically examine the pitfalls of forming dichotomies between the local or the national and the global or the center and the periphery

Migration from the Middle East and North Africa to Europe Heinz Fassmann, Michael Bommers, Wiebke Sievers, 2025-10-01 One of the most important challenges concerning the future of the European Union is the demographic reproduction of the European population Decreasing birth rates and the retirement of the baby boomers will dramatically reduce the labour force in the EU which will entail not only a lack of manpower but also lower contributions to European social systems It seems clear that the EU will have to counterbalance this population decrease by immigration in the coming years Migration Between the Middle East North Africa and Europe takes this challenge as a point of departure for analysing the MENA region in particular Morocco Egypt and Turkey as a possible source of future migration to the European Union At the same time it illustrates the uncertainties implied in such calculations especially at a time of radical political changes such

as those brought about by the Arab Uprising A wide and scientific overview on migration potential from the NEMA region to the EU
