Earthquake and Volcanic Eruption Disasters David Chester, Angus Duncan, John Duncan, 2024-07-26 This book argues
that although secular and religious perspectives on disasters have often conflicted today there are grounds for believing that
the world s major faiths have much to contribute to the processes of post disaster recovery and future disaster risk reduction
DRR It seeks to demonstrate how contemporary dialogues between theologians disaster scholars and policymakers are
defining new ways of working together These explore how the resources of religious communities e g buildings human
resources and finance may be used to foster successful policies of DRR particularly in the aftermath of earthquakes and
volcanic eruptions Musing on the relationships between religion and disasters has occurred for millennia and has affected
many societies worldwide In societies where the world s major religions Buddhism Christianity Hinduism Islam Judaism and
Shinto have been and remain dominant attempting to find supernatural explanations for disasters has occurred throughout
history and there have been many theologies seeking to explain why people suffer losses It is argued that developments both
within these traditions of faith and in how disasters are understood by the hazard research community of researchers and
planners have allowed a new modus vivendi to emerge which emphasises both a recognition of religious worldviews by
academic writers and disaster planners on the one hand and a desire by people of faith and their leaders to be more fully
committed to the goals of DRR The book will appeal to those who are interested in the interface between disasters and
theology across the principal religions of the world This includes researchers and students in geology geography theology
and religious studies It will also be useful for specialist academic audience and the educated general reader *The*
