Glickman,Michael A. Harvey,2013-10-23 The impetus for this volume is the growing awareness within the mental health and larger community of a culturally affirmative model for understanding and assisting deaf people In contrast to the medical pathological model which treats deafness as a disability the cultural model guides us to view deaf persons in relation to the deaf community a group of people with a common language culture and collective identity A primary tenant of culturally affirmative psychotherapy is to understand and respect such differences not to eradicate them The contributors to this volume present a practical and realistic model of providing culturally affirmative counseling and psychotherapy for deaf people The three dimensions of this model have been delineated by the multicultural counseling literature These dimensions assert that culturally affirmative psychotherapy with deaf persons requires therapist self awareness knowledge of the deaf community culture and understanding of culturally syntonetic therapeutic interventions The first to exhaustively delineate the implications of the cultural model of deafness for counseling deaf people this book is essential reading for anyone who works in an educational or counseling capacity with the deaf This audience includes not only psychotherapists but also vocational
