Abdalla Yousif,2019-09-29 The SWGU believes that comprehensive development and planning processes can only be realised through the promotion of women s empowerment To achieve this goal the SWGU established a coordination mechanism with one of the biggest Sudanese federal ministries the Ministry for Social Planning MSP and in particular the National Council for Social Planning NCSP at both national and state levels Through fundamental empowerment activities women not only participated but also lead those institutions functionally related to the National Economic Planning Council NEPC Accordingly all work was harmonised to pursue the set of goals stated in the Comprehensive Poverty Reduction Strategy CPRS Since women s concerns are varied numerous and interdisciplinary in nature the SWGU officially directed it efforts towards the promotion of women s causes while unofficially targeting the whole spectrum of governmental institutions and non governmental organisations NGOs rather than limiting its efforts by trying to establish a ministry for women s affairs

Civil Society and Women Activists in the Middle East Wanda Krause,2012-05-27 In the Middle East and in Egypt in particular there has always been a tendency to accord complete supremacy to the authority and might of the state and to see society as a separate powerless entity However after the uprising of 2011 this assumption was turned on its head And it is the wide range of political activity beyond the remit of the official state where Wanda Krause locates a dynamic potential for political change from the bottom up She looks in particular at the influential role of women s private voluntary organisations

in Egypt in shaping concepts of civil society and democracy Exploring both secular and Islamist organisations she offers a steadfast critique of the view that Islamic women activists are insignificant backward or uncivil Krause s examination of women activists in Egypt today is vital for those interested in Middle East and Gender Studies as well as those researching the wider issues of civil society and democratisation

emancipatory effect for people long mired in conditions of poverty and economic insecurity *Beyond Micro-credit* Thomas Fisher, M. S. Sriram, 2002 *Beyond Micro Credit* sets out how Indian Micro Finance Initiatives are combining micro finance with a wide range of development goals these include not only poverty alleviation through providing savings credit and insurance services but also promoting livelihoods empowering women building people's organizations and changing institutions Women and the Political Process Dr. Renu Mishra, 2022-01-22 Political parties are among the most important institutions affecting women's political participation In most countries parties determine which candidates are nominated and elected and which issues achieve national prominence The role of women in political parties is therefore a key determinant of their prospects for political empowerment particularly at the national level Because political parties are so influential in shaping women's political prospects Governments and international organizations seeking to advance the participation of women in elections justifiably tend to focus on the role of political parties Political participation extends beyond parties however Women can also become involved in certain aspects of the electoral process through independent action particularly at the local level and by joining civil society organizations Some women in post conflict countries have gained political experience by participating in non elected transitional assemblies Women's networks trade unions non governmental organizations and the media can all provide avenues for women's political participation In many countries the rights of women are enshrined in law and there are no formal legal barriers to women's political participation in election processes In practice however there are often formidable obstacles to women's active participation in politics The hurdles to be overcome can be particularly daunting for women considering running for office and maybe overwhelming for women in post conflict countries Politics has traditionally been a male domain that many women have found unwelcoming or even hostile Societies in which traditional or patriarchal values remain strong may frown on women entering politics In addition to dealing with unfavorable cultural predilections women are often more likely than men to face practical barriers to entering politics including a paucity of financial resources lower levels of education less access to information greater family responsibilities and deprivation of rights that has left them with fewer opportunities to acquire political experience This book gives a critical account of women's participation in politics and the politicization of women's issues Women's Liberation Movement has concentrated on women's oppression which includes the sexual division of labor control of sexuality and the relation of reproduction access to education jobs and power over our lives **Dangerous Intersections** Jael Miriam Silliman, Ynestra King, 1999 This anthology offers a multicultural international look at the issues of environment development and population control Feminist scholars and activists reveal the racism behind the scapegoating of women the poor and immigrants as the source of major world problems and present realistic solutions that rely on the ingenuity and resourcefulness of women *Sustainable Food Security*, 2010 Contributed articles **Doing Gender, Doing Geography** Saraswati Raju, Kuntala Lahiri-Dutt, 2012-12-06 Until the 1970s gender had been invisible in analyses of social space and

place in the androcentric discipline of geography While recent contributions to feminist geography have challenged this in India the engagement of geographers with gender by being conservative in its choice of focus and orthodox in methodology has been unable to destabilise the established disciplinary order However with younger scholars becoming increasingly interested in studying gender in geography novel and innovative methods that include combinations of quantitative and qualitative analyses visual sources and in depth case studies are being tried out and accepted in geography despite its masculine legacy This pioneering study brings together Indian geographers contributions to understanding gender and through them seeks to enrich the discipline of geography It engages with the recent spatial turn in the social sciences which has reclaimed the explanatory power of space and place in social theory that had been nearly lost to deconstructive postmodernist scholarship The volume draws entirely from the Indian scholarship showcasing contextualised knowledge production but hopes to initiate a dialogue with scholars elsewhere working with feminist methodologies

Empowering Society Usha Jumani,2006-03-06 Empowerment is an integral element of a democratic system The maturity of a democracy is directly related to the level of empowerment its citizens and institutions experience The term empowerment is used in different contexts and this book addresses this problem through a comparative analysis of three major organisational systems business government and social development The book presents a new conceptual framework for understanding the process of empowerment It combines case studies specially for this volume with secondary data and the author s first hand experience of working with development organisations The differential understanding of empowerment in various organisational contexts helps to promote cross sectoral learning and contributes to a qualitative shift in empowering society as a whole
