Special Topics In Endocrinology And Metabolism Volume 7:

Hormone Resistance and Other Endocrine Paradoxes Margo P. Cohen, Piero P. Foa, 2012-12-06 Endocrinology and Metabolism Progress in Research and Clinical Practice is a new series that has been designed to present timely critical reviews of constantly evolving fields to provide practical and up to date guidance in the solution of pertinent clinical problems to offer an alternative to the laborious search of the literature and the often frustrating reading of highly technical articles and to translate the language of the laboratory into that of the practice of medicine We think that this volume and those to come will prove useful to physicians and to physicians in training as well as to investigators in a wide variety of specialties in short to anyone who seeks answers to questions in endocrinology and metabolism The first chapter of this volume could well serve as a general introduction to the entire series It points out how our growing understanding of the molecular basis of biologic communication has led to the discovery of a growing number of clinical syndromes as well as to the realization that phenotypically similar diseases may have radically different pathogenetic mechanisms and thus may require radically different therapeutic strategies Medical and Health Care Books and Serials in Print ,1997 **List of Serials and Monographs Indexed for Online Users** ,1990 **Zinc in Human Biology** Colin F. Mills, 2013-03-14 The present volume is one of a series concerned with topics considered to be of growing interest to those whose ultimate aim is the understanding of the nutrition of man Volumes on Sweetness Calcium in Human Biology and Sucrose Nutritional and Safety Aspects have already been published and another on Dietary Starches and Sugars in Man A Comparison is in preparation Written for workers in the nutritional and allied sciences rather than for the specialist they aim to fill the gap between the textbook on the one hand and the many publications addressed to the expert on the other The target readership spans medicine nutrition and the biological sciences generally and includes those in the food chemical and allied industries who need to take account of advances in these fields relevant to their products Funded by industry but with an independent status the International Life Sciences Institute ILSI is a non profit organization founded to deal objectively with the numerous health and safety issues that today concern industry internationally ILSI sponsors scientific research organizes conferences and publishes monographs relative to these problems London Ian Macdonald March 1988 Series Editor Preface This volume has been prepared at a time when interest in both the biological roles of zinc and its nutritional significance is growing rapidly Principles and Practice of Resistance Training Michael H. Stone, Meg Stone, William A. Sands, 2007 Aimed at strength and conditioning specialists health and fitness professionals personal trainers and exercise scientists this research based book details the physiological and biomechanical aspects of designing resistance training programmes for improved power strength and performance in athletes **Books in Print** ,1991 **Principles and Practice of Endocrinology and Metabolism** Kenneth L.
