Rice as Self Emiko Ohnuki-Tierney, 1993 In this engaging account of the crucial significance of rice for the Japanese Emiko Ohnuki Tierney examines how people use the metaphor of a principal food such as rice corn or wheat in conceptualizing themselves in relation to other peoples who eat other foods Rice as Self shows how the Japanese identity was born through discourse with the Chinese the first historical other It shows how rice agriculture in itself introduced from outside was ironically appropriated as a dominant metaphor of the Japanese self Since then rice and rice paddies have served as the vehicles for their deliberation of selves and others Using for evidence such diverse sources as myth histories of the eighth century the imperial accession ritual woodblock prints novels day to day discourse and opinion polls Ohnuki Tierney shows that throughout Japan's history the cultural importance of rice has been deeply embedded in Japanese cosmology both of the elite and common folk rice as soul rice as deity and ultimately rice as self of the family the community and the nation at large This she emphasizes has been so even though rice has not been the staple food of the Japanese as is commonly held Using Japan as an example Ohnuki Tierney proposes a new and complex cross cultural model for the interpretation of selves and others The historical transformations of the Japanese identity have been intimately related not only to their encounter with foreigners the external other but also to the process of the marginalization of minorities within Japanese society the internal other and of external others who ceased to be the privileged other The model takes into account the power inequities both within and outside a given society It has broad applications especially to people for whom foreign cultural hegemony is part and parcel of a complex often ambivalent process of self identity
