Special Issue On Technology Productivity And Employment:

The Relations between Defence and Civil Technologies Philip Gummert, Judith Reppy, 2013-03-09 This book arises from a meeting held at Wiston House Sussex UK in September 1987 The meeting brought together academic governmental and industrial experts from eight countries to discuss the increasingly important subject of the relations between civil and defence technologies It was primarily funded under the Advanced Research Workshops Programme of NATO's Scientific Affairs Division and was the first science policy workshop funded by the Programme Additional financial support came from the Leverhulme Trust The choice of topic of speakers and finally of papers to be published was entirely ours The conclusions reached were our own and those of the participants They were not in any way guided by NATO nor do they represent NATO policy We speak for all the participants in offering our thanks to the NATO Scientific Affairs Division especially Secretary General Durand and Dr Craig Sinclair for their generosity and encouragement Without them this book would not exist We thank the Leverhulme Trust for enabling assistance to be provided to the Workshop Directors in the form of Iain Bate who himself played a major part in the success of the meeting The staff of Wiston House must also be thanked for providing an admirable environment for the meeting For secretarial support prior to the meeting we thank Gill Miller and Lesley Price Finally we offer special thanks to Mrs Yvonne Aspinall for converting all the papers in whatever state they were presented into camera ready copy with such professionalism and good humour

Acquiring, Adapting and Developing Technologies Kwan S. Kim, Fumio Maki, Ryoshin Minami, Jung-hae Seo, 1995-02-12 Economic progress requires technological development which in turn depends on a country's social capacity to acquire assimilate and develop new technologies Focusing on the evolution of Japan's economy from the Meiji Restoration to the present day this volume provides an authoritative account firmly grounded in theoretical and empirical analysis of the country's attempts to generate the necessary social capacity for technological innovation and absorption Successive chapters address the specific experiences of a number of key Japanese industries during this process Each industrial case study is written by an acknowledged expert in the field and presents material of significant interest to specialists in economic development in a form that is also accessible to the nonspecialist The book concludes with a summary of useful lessons variously applicable to countries at all the different stages of industrialization

The Palgrave Handbook of the Sociology of Work in Europe Paul Stewart, Jean-Pierre Durand, Maria-Magdalena Richea, 2018-11-02 This book explores the key conceptual features of the development of the Sociology of Work SoW in Europe since 1945 using eleven country case studies An original contribution to our understanding of the trajectory of the SoW the chapters map the current state of the theoretical background of the sub-discipline's development to broader socio-political and economic changes traced across a heterogeneous set of national contexts Different definitions of the SoW in each country often reflect variations in the focus of analysis and these chapters link the subject definition and focus to other social science disciplines the state as well as social class interests and ideologies The

book contends that the ways in which the sub discipline makes sense of changes in work is itself a response to the type of society in which the sub discipline is practiced whether in the post war social democratic West the Soviet East or today's societies dominated by variant forms of neo liberalism It will be of use to scholars and students interested in the transnational history of the discipline of sociology with a specific focus on the nexus between the sociology of labour ideology economics and politics
