Snail Transmitted Parasitic Diseases Emile A. Malek, 2018-05-04 Research

on snail transmitted disease has continued at a considerable pace during the last twenty years and several investigators have made valuable contributions to our knowledge of these diseases. The objective of this book is to present an up to date account of the infections or diseases of the world which are transmitted by snails and in which each disease is considered in much greater detail than is usually provided by textbooks on general medical or veterinary parasitology. These two volumes cover the infections or diseases that are caused by certain helminths which are transmitted by snails.

**The Hepatitis C Viruses**  
C.H. Hagedorn, C.M. Rice, 2012-12-06 Chronic hepatitis C is a major worldwide health problem affecting more than 170 million people. Chronic infections lead to cirrhosis and liver failure or hepatocellular cancer in many instances. This volume includes comprehensive reviews that cover much of the vast literature that has appeared since the identification of the hepatitis C virus RNA genome. It will be an invaluable collection for anyone wanting an up to date picture of HCV transmission, molecular virology, immune response, cellular molecular pathogenesis and possible avenues for developing effective new therapeutics and vaccines.

**Acoustic Communication in Birds** Kroodsma, 1983-05-10 Acoustic Communication in Birds Volume 2 Song Learning and Its Consequences investigates acoustic communication in birds with emphasis on song learning and its consequences. Some issues in the study of bird sounds are discussed with particular reference to evolutionary considerations. The ontogeny of acoustic behavior in birds is also considered along with sound production, neural control of song and auditory perception. Comprised of nine chapters, this volume begins with an introduction to the nature, extent and evolution of vocal learning in birds. Several well documented examples in which vocal development appears to proceed independently of audition and therefore independently of vocal learning are presented together with aspects of selective vocal learning, the timing of vocal learning and selective forces that may have promoted the evolution of vocal learning in birds. Subsequent chapters explore the role of subsong and plastic song in the vocal learning process, the function and evolution of avian vocal mimicry, the ecological and social significance of duetting in birds and microgeographic and macrogeographic variation in the acquired vocalizations of birds. The book also examines genetic population structure and vocal dialects in Zonotrichia Emberizidae. This monograph will be of interest to ornithologists, evolutionary biologists and zoologists as well as to students of communication and bioacoustics.
