Mitchell,2008-11-17 American companies once focused exclusively on providing the best products and services But today most corporations are obsessed with maximizing their stock prices resulting in short term thinking and the kind of cook the books corruption seen in the Enron and WorldCom scandals How did this happen In this groundbreaking book Lawrence E Mitchell traces the origins of the problem to the first decade of the 20th century when industrialists and bankers began merging existing companies into huge combines today s giant corporations so they could profit by manufacturing and selling stock in these new entities He describes and analyzes the legal changes that made this possible the federal regulatory efforts that missed the significance of this transforming development and the changes in American society and culture that led more and more Americans to enter the market turning from relatively safe bonds to riskier common stock in the hopes of becoming rich Financiers and the corporations they controlled encouraged this

trend but as stock ownership expanded and businesses were increasingly forced to cater to stockholders get rich quick expectations a subtle but revolutionary shift in the nature of the American economy occurred finance no longer served industry instead industry began to serve finance The Speculation Economy analyzes the history behind the opening of this economic Pandora's box the root cause of so many modern acts of corporate malfeasance [Speculation And The Dollar](#) Laurence Krause, 2019-07-11 I began serious consideration of the issues and subject matter that comprise this book as a graduate student at the University of Massachusetts at Amherst In need of a dissertation topic and vaguely curious about international monetary economics I decided to sit in on Leonard Rapping's undergraduate course on international finance Needless to say I was soon hooked Within several months I was teaching my own course on international money and beginning to write an outline of what would become my doctoral dissertation on foreign exchange speculation Once completed the dissertation thesis became this basis for this book

Profit-making Speculation In Foreign Exchange Markets Patchara Surajaras, Richard J Sweeney, Richard Burdekin, 2019-09-05 Technical analysis is not supposed consistently to beat financial markets In this book however Professors Surajaras and Sweeney seek to establish that carefully chosen rules can produce substantial and consistent measured profits over time The authors also call into question the traditional academic wisdom that markets in general are efficient [Speculation](#) Stuart Banner, 2017 What is the difference between a gambler and a speculator Is there a readily identifiable line separating the two If so is it possible for us to discourage the former while encouraging the latter These difficult questions cut across the entirety of American economic history and the periodic failures by regulators to differentiate between irresponsible gambling and clear headed investing have often been the proximate causes of catastrophic economic downturns Most recently the blurring of speculation and gambling in U S real estate markets fueled the 2008 global financial crisis but it is one in a long line of similar economic disasters going back to the nation's founding In Speculation author Stuart Banner provides a sweeping and story rich history of how the murky lines separating investment speculation and outright gambling have shaped America from the 1790s to the present Regulators and courts always struggled to draw a line between investment and gambling and it is no easier now than it was two centuries ago Advocates for risky investments have long argued that risk taking is what defines America Critics counter that unregulated speculation results in bubbles that always draw in the least informed investors gamblers essentially Financial chaos is the result The debate has been a perennial feature of American history with the pattern repeating before and after every financial downturn since the 1790s The Panic of 1837 the speculative boom of the roaring twenties and the real estate bubble of the early 2000s are all emblematic of the difficulty in differentiating sober from reckless speculation Even after the recent financial crisis the debate continues Some chastened by the crash argue that we need to prohibit certain risky transactions but others respond by citing the benefits of loosely governed markets and the dangers of over regulation These episodes have generated deep ambivalence yet Americans faith in investment and by extension the stock

market has always rebounded quickly after even the most savage downturns. Indeed the speculator on the make is a central figure in the folklore of American capitalism. Engaging and accessible, *Speculation* synthesizes a suite of themes that sit at the heart of American history: the ability of courts and regulators to protect ordinary Americans from the ravages of capitalism; the periodic fallibility of the American economy; and not least the moral conundrum inherent in valuing those who produce goods over those who speculate, and yet enjoying the fruits of speculation. Banner's history is not only invaluable for understanding the fault lines beneath the American economy today, but American identity itself.

Some Thoughts on Speculation Frank Hixal Fayant, 1909

Nigerian Speculative Fiction Chukwunonso Ezeiyoke, 2025-05-30

This book is an exciting addition to a gap in non-Western genre studies of African fiction. It challenges the dominant canonicity of African literature, which is overshadowed by texts concerned with the colonial discourse and writing back, while exploring speculative themes in Nigerian fiction and writing that stem from an African cosmology and culture. The book examines important twentieth-century precursors of the post-millennial boom in Nigerian Speculative Fiction (SF), reading texts that were omitted from the Nigerian literary canon developed in the 1960s. It combines an analysis of recent fiction and criticism with a historical overview of the development of the under-researched area of Nigerian SF. Through these readings, the author demonstrates the range of concerns explored by Nigerian SF, including futurism, posthumanism, horror, fantasy, and science fiction, among others. This book argues that these narratives exceed the binary implicitly sustained by the texts that write back to the West and offers new readings of contemporary Nigerian SF works that imagine futures different from the past and present conditions imposed by capitalism, colonialism, and imperialism. Providing new theoretical tools and concepts, this book in the *Studies in Global Genre Fiction* series will be of interest to readers and scholars working in the fields of African studies, African culture and society, literature and language, interdisciplinary literary studies, area studies, literary criticism, and genre studies.

Speculative Markets Kristin Peterson, 2014-08-25

In this unprecedented account of the dynamics of Nigeria's pharmaceutical markets, Kristin Peterson connects multinational drug company policies, oil concerns, Nigerian political and economic transitions, the circulation of pharmaceuticals in the Global South, Wall Street machinations, and the needs and aspirations of individual Nigerians. Studying the pharmaceutical market in Lagos, Nigeria, she places local market social norms and credit and pricing practices in the broader context of regional transnational and global financial capital. Peterson explains how a significant and formerly profitable African pharmaceutical market collapsed in the face of U.S. monetary policies and neoliberal economic reforms, and she illuminates the relation between that collapse and the American turn to speculative capital during the 1980s. In the process, she reveals the mutual constitution of financial speculation in the drug industry and the structural adjustment plans that the IMF imposed on African nations. Her book is a sobering ethnographic analysis of the effects of speculation and development as they reverberate across markets and continents and play out in everyday interpersonal transactions of the Lagos pharmaceutical market.

Financial Speculation and Fictitious Profits

Gustavo Moura de Cavalcanti Mello, Mauricio de Souza Sabadini, 2019-09-26 This book provides an original account of financialisation and outlines the creation of fictitious profits as a basis to describe the present phase of capitalist accumulation in the neoliberal era Making innovative theoretical elaborations on Marx's notion of fictitious capital *Financial Speculation and Fictitious Profits* offers a dialectic analysis of the increasing financialization during this crisis ridden period based on the original concepts of fictitious profit and fictitious wealth Combining the most important research from over twenty years of scholarly inquiry with groundbreaking new studies *Financial Speculation and Fictitious Profits* is more than a collection of texts by political economists on a contemporary topic it is a synthesis of an intense process of academic production that began with work of Karl Marx and has resulted in the formulation of a differentiated interpretative perspective on the contemporary evolution of capitalist crisis
