Compelling Stories for English Language

Learners Janice Bland, 2022-10-06 An International Research Society for Children's Literature IRSCL Honour Book for 2023

This book is a comprehensive and thorough introduction to children's and young adult literature in English language education. Reading is promoted as central to language education in order to experience perspectives from around the world and the book demonstrates the many opportunities for teaching with compelling story encouraging an active and engaged community of second language readers through challenging picturebooks, motivating graphic novels, dynamic plays, enchanting verse novels and compelling young adult fiction. Using many examples of literary texts that are well suited to the primary or secondary classroom, the book focuses on the advantages of deep reading and the vital importance of in-depth learning. In-depth learning is an approach that involves the students as motivated participants working collaboratively and with empathy while preparing for and confronting the challenges of the 21st century. Illustrating the approach with a Deep Reading Framework based in research and theory, Janice Bland guides the reader to discover and learn how to make use of literary texts in a way that challenges students to become involved in interculturality, creativity and critical literacy. Throughout the book, the emphasis is on an approach that puts the reader and language learner in the centre, not a study of literature but a study of how readers learn through compelling story.

Creative Teachers Dennis Sale, 2020-03-05 This book offers teaching training professionals an evidence-based pedagogic guide to teaching effectively, efficiently and creatively, also known as Creative Teaching Competence. Secondly, it demonstrates what creativity actually looks like in terms of specific teaching practices, modeling the underpinning processes, syntax of creative learning design. It then establishes Metacognitive Capability as the superordinate twenty-first century competency in that this unique human attribute can significantly enhance the cognitive and motivational strategies essential for facilitating self-directed learning and wellbeing.
