Speech and Language Assessment for the Bilingual Handicapped Larry J. Mattes, Donald R. Omark, 1984-01-01
Language Disabilities in Cultural and Linguistic Diversity Deirdre Martin, 2009
Language Disabilities in Cultural and Linguistic Diversity offers a new approach to understanding the familiar dilemma of disentangling difficulties in communication for learners developing the language of schooling. The author takes a socio cultural Vygotskian approach to reinterpret international research in language disabilities namely specific language impairment, communication difficulties, dyslexia and deafness.
Bilingualism and Language Disability (PLE: Psycholinguistics) Nick Miller, 2013-11-12
Society is becoming increasingly multi lingual and this presents monolingual professionals particularly those in special education and speech pathology with severe problems. Is the language delay in a child from a bilingual environment a result of this background or is there a specific speech problem? Is a child's poor performance in school due to his problems of coping with two languages or does he need remedial teaching? Originally published in 1984, this book is not concerned with second language learning but with speech and learning difficulties in bilingual children as they are presented to remedial teachers, psychologists and speech therapists. To this end, the first group of specially written articles deals with the patterns of language usage in bilingual communities and the social and psychological factors which shape these patterns with processes in normal bilingual language acquisition and with the relationship between cognitive development and growing up with two languages. Management issues and methods involved in helping children with language problems are also tackled; they include taking case histories, family liaison, counselling, bilingual programmes, mother tongue teaching, curriculum development and the training of personnel to work in the bilingual bicultural field. This book provided a great deal of practical help in a field that was relatively new at the time of writing and helped to enlighten readers on the issues involved and assist in crystalising thought and directing future research.

Interprofessional Practice with Diverse Populations Allan Barsky, Esther Geva, Fern Westernoff, 2000-08-30
Concepts such as cultural competence, multicultural practice and ethnosensitivity have taken root in the literature. At the same time, concepts such as cross disciplinary, transdisciplinary, interdisciplinary and interprofessional practice have been articulated. Although these two trends coexist in print, the literature in the various helping professions does not address whether and how the issues of client diversity and interprofessional practice can come together in productive and better informed ways. The present book promises to close this gap and offer health care professionals theoretically grounded examples of best practices. The range of diversity includes Native American, Taiwanese, Portuguese, African American, Algerian, Irish, South Asian and gay clients.
