IAV GmbH, 2024-10-28 In addition to the indisputably necessary electrification of the transport sector which is currently being ramped up internal combustion engines will still be urgently needed in the future Otherwise the demand for mobility in the on road off road and non road sectors cannot be met There is no doubt that these internal combustion engines will have to be improved regarding efficiency plus lower emissions and nowadays more and more important upgraded for zero and low carbon fuels Even though Spark Ignition SI engines have been around for more than a century there is still a lot of room for improvement particularly in terms of power density ignition combustion control and preventing uncontrolled combustion To offer all interested developers an inspiring exchange platform for the latest developments IAV established two exciting conferences more than two decades ago which are now held under the heading Two Conferences One Goal This volume brings together the contributions to this conference      *Proceedings of the 1998 Fall Technical Conference of the ASME*
