Oh,2022-07-18 Offers a new framework for understanding ethnic and racial difference in Korea The Blood of the Colony Owen White,2021-01-12 The surprising story of the wine industry s role in the rise of French Algeria and the fall of empire We owe to wine a blessing far more precious than gold the peopling of Algeria with Frenchmen stated agriculturist Pierre Berthault in the early 1930s In the last decades of the nineteenth century Europeans had displaced Algerians from the colony s best agricultural land and planted grapevines Soon enough wine was the primary export of a region whose mostly Muslim inhabitants didn t drink alcohol Settlers made fortunes while drawing large numbers of Algerians into salaried work for the first time But the success of Algerian wine resulted in friction with French producers challenging the traditional view that imperial possessions should complement not compete with the metropole By the middle of the twentieth century amid the fight for independence Algerians had come to see the rows of vines as an especially hated symbol of French domination After the war Algerians had to decide how far they would go to undo the transformations the colonists had wrought including the world s fourth biggest wine industry Owen White examines Algeria s experiment with nationalized wine production in worker run vineyards the pressures that resulted in the failure of that experiment and the eventual uprooting of most of the country s vines With a special focus on individual experiences of empire from the wealthiest Europeans to the poorest laborers in the fields The Blood of the Colony shows the central role of wine in the economic life of French Algeria and in its settler culture White makes clear that the industry left a long term mark on the development of the nation **Proceedings of the Royal Society**

 Procreation "* Anthony Colantuono,2017-07-05 Titian Colonna and the Renaissance Science of Procreation demonstrates that
 two major monuments of Italian Renaissance culture Bellini s and Titian s famous series of mytho poetical paintings for the
 camerino of Duke Alfonso d Este of Ferrara and Francesco Colonna s Hypnerotomachia Poliphili were conceived as
 mnemonic or pedagogical devices aimed at educating the reader beholder in the medical science of reproductive physiology
 and the maintenance of sexual health It is further argued that the learned courtier Mario Equicola who conceived the
 pictorial program of Duke Alfonso s camerino had read Colonna s text and was extensively inspired by its prior literary
 argument The study is organized in two parts intimately interrelated The first part is a study of Alfonso d Este s camerino
 with a general introduction individual chapters on each of Bellini s and Titian s four pictorial bacchanals and a conclusion
 proposing a new and more accurate reconstruction of the layout of the room also including a completely new way of
 interpreting the ensemble The second part of the study concerns Colonna s Hypnerotomachia Poliphili again beginning with
 its own introductory essay and advancing a completely new interpretation of the text The brief conclusion brings the insights
 of the two sections together clarifying the historical relationship between the pictorial and literary works and explaining their
 larger cultural significance Emphasizing Equicola s use of the Hypnerotomachia as a model for pictorial invention the author
 reveals how Titian s remarkably sensuous paintings and Colonna s erotically charged romance are related by their common
 reference to the neo Aristotelian medical theory of the libidinal seasons and by corollary themes of marriage and sexual
 consummation This peculiar intersection of cultural themes came to prominence in the context of a courtly world in which
