America 1997 and several articles on nineteenth century masculinity      *The Age of the Bachelor* Howard P. Chudacoff, 2000-09-17 In this engaging new book Howard Chudacoff describes a special and fascinating world the urban bachelor life that took shape in the late nineteenth century when a significant population of single men migrated to American cities Rejecting the restraints and dependence of the nineteenth century family bachelors found sustenance and camaraderie in the boarding houses saloons pool halls cafes clubs and other institutions that arose in response to their increasing numbers Richly illustrated anecdotal and including a unique analysis of *The National Police Gazette* the most outrageous and popular men s publication of the late nineteenth and the early twentieth century this book is the first to describe a complex subculture that continues to affect the larger meanings of manhood and manliness in American society The figure of the bachelor with its emphasis on pleasure self indulgence and public entertainment was easily converted by the burgeoning consumer culture at the turn of the century into an ambiguously appealing image of masculinity Finding an easy reception in an atmosphere of insecurity about manhood that image has outdistanced the circumstances in which it began to flourish and far outlasted the bachelor culture that produced it Thus the idea of the bachelor has retained its somewhat negative but alluring connotations throughout the rest of the twentieth century Chudacoff s concluding chapter discusses the contemporary singles scene now developing as the number of single people in urban centers is again increasing By seeing bachelorhood as a stage in life for many and a permanent status for some Chudacoff recalls a lifestyle that had a profound impact on society evoking fear disdain repugnance and at the same time a sense of romance excitement and freedom The book contributes to gender history family history urban history and the study of consumer culture and will appeal to anyone curious about American history and anxious to acquire a new view of a sometimes forgotten but still influential aspect of our national past      *Historical Scientific Instruments in Contemporary Education* ,2021-11-15 These essays draw on recent and versatile work by museum staff science educators and teachers showing what can be done with historical scientific instruments or replicas Varied audiences with members just like you can be made aware of exciting aspects of history observation problem solving restoration and scientific understanding by the projects outlined here by professional practitioners These interdisciplinary case studies ranging from the cinematic to the hands on show how inspiration concerning science and the past can give intellectual pleasure as well as authentic learning to new participants who might include people like you students teachers curators and the interested and engaged public Contributors are Dominique Bernard Paolo Brenni Roland Carchon Elizabeth Cavicchi St phane Fischer Peter Heering J W Huisman Fran oise Khantine Langlois Alistair M Kwan Janet Laidla Pierre Lauginie Panagiotis Lazos Pietro Milici Flora Paparou Fr d rique Plantevin Julie Priser Alfonso San Miguel Danny Segers Constantine Kostas Skordoulis Trienke M van der Spek Constantina Stefanidou and Giorgio Strano      *A Contemporary History of the U.S. Army Nurse Corps* Mary T. Routledge is an imprint of Taylor Francis an informa company **Timeless Truth in the Hands of History** Gale Heide, 2012-03-16 What is the purpose of theology for the church Systematic theology provides an inroad into this question by offering both a method for doing theology and an explanation for the purpose of that method However system is itself the product of a specific understanding of knowledge grounded in rational demonstration of facts This study attempts to address the historical debate over when systematic theology began Much of the debate is centered on the definition of system and revolves around the use or lack thereof of external philosophical categories or language Specific historical figures have been selected to serve as illustrations of how theological prolegomena functioned in works prior to and following the influence of Enlightenment thought In the early chapters it will be seen that theology was neither totally saturated with nor totally devoid of external philosophical reference points or programmatic intentions On the contrary both external points of reference and programmatic intentions have played a role in theology since the church's inception In other words certain elements of system e.g logic non contradiction organization have played a role in theological investigation and construction since at least the second century The last two chapters of this study demonstrate that these may not be the same influences that have marked post Enlightenment systematics One of the primary characteristics of pre Enlightenment theology is its intentional focus on the life of the church Theology like the Scriptures was often written for specific circumstances Enlightenment

influences significantly changed the intentions of much of theology in that theological knowledge was studied and displayed for the sake of knowledge itself. The church no longer mattered or was at best an afterthought in the realm of what is now seen as the domain of academic theology.
