The Bad Object Handling The Negative Therapeutic Reaction In Psychotherapy:

The Bad Object Jeffrey Seinfeld, 1990 This book is about the psychodynamics and treatment of the negative therapeutic reaction the patient's inability to tolerate progress in treatment With abundant clinical material Seinfeld shows how the bad object appears in the transference and in the patient's everyday interpersonal relationships and he offers therapeutic guidelines for specific clinical interventions Inside book cover *A Primer of Handling the Negative Therapeutic Reaction* Jeffrey Seinfeld, 2002 In a negative therapeutic reaction the progress of treatment triggers a particular destructive dynamic in the patient Initially therapists considered it to be a result of the patient's pathology but contemporary clinicians recognize that the therapist may significantly contribute to this process Object relations clinicians see the individual as a social being that develops in relation to others whom the individual internalizes as good and bad objects Jeffrey Seinfeld explores how an internal sabotaging self is identified with a rejecting object This self is a reservoir of memories of how original caregivers rejected the child's needs and the patient now expects the world to reject and disappoint her If patients experience the therapist as a kind or caring person they may feel that they are being lured into dependency and subsequent disappointment Paradoxically if patients feel attached to the therapist this same attachment is experienced as a threatening dependency that must be destroyed A relationship that could eventually strengthen the personality is rejected and instead a negative reaction to the therapist and the therapeutic process is established Jeffrey Seinfeld shows that in order for patients to heal they must separate from the internal bad objects This is often done with aggression against the therapist who must be able to withstand the intense hostility rage and abuse of the patient Only by surviving this aggression in the negative therapeutic reaction can the therapist allow the patient to integrate good and bad part objects in the transference The therapist can eventually serve as a bridge in the integration of the divided good and bad selves and objects Through case histories Seinfeld illustrates his way of entering into the patient's internal world By helping patients understand the transference of their internal objects they begin to understand their own experience of self and others which leads to character change , Moments of Uncertainty in Therapeutic Practice Robert Waska, 2011-11-15 One of therapy's greatest challenges is the moment of transference when a patient unconsciously transfers emotion or desire to a new and present object in some cases the therapist During the course of treatment a patient's projections and the analyst's struggle to divert them can stress distort or contaminate the therapeutic relationship It may lead to various forms of enactment in which the therapist unconsciously colludes with the client in interpretation and treatment or it can lead to projective identification in which the client imposes negative feelings and behaviors onto the therapist further interfering with analysis and intervention Drawing on decades of clinical case experience Robert Waska leads practitioners through the steps of phantasy and transference mechanisms and their ability to increase oppose embrace or neutralize analytic contact Operating from a psychoanalytic perspective he explains how to cope professionally with moments of transference and maintain an objective interpretive stance within the

ongoing matrix of projective identification countertransference and enactment Each chapter discusses a wide spectrum of cases and clinical situations describing in detail the processes that invite a playing out of the patient's phantasies and the work required to reestablish balance Refreshingly candid Waska recognizes the imperfections of analysis yet reaffirms its potential for greater psychological integration and stability for the patient He acknowledges the limits and frequent roadblocks of working with difficult patients such as those who suffer from psychic retreat paranoid phantasies and depressive anxieties yet he indicates an effective path for resetting the clinical moment and redirecting the course for treatment

Affect Regulation and the Repair of the Self (Norton Series on Interpersonal Neurobiology) Allan N. Schore, 2003-05-17 This volume one of two is the first presentation of Schore's comprehensive theory in book form as it has developed since 1994 In 1994 Allan Schore published his groundbreaking book *Affect Regulation and the Origin of the Self* in which he integrated a large number of experimental and clinical studies from both the psychological and biological disciplines in order to construct an overarching model of social and emotional development Since then he has expanded his regulation theory in more than two dozen articles and essays covering multiple disciplines including neuroscience psychiatry psychoanalysis developmental psychology attachment and trauma *Affect Regulation and the Repair of the Self* contains chapters on neuropsychanalysis and developmentally oriented psychotherapy It is absolutely essential reading for all clinicians researchers and general readers interested in normal and abnormal human development

Affect Regulation And The Repair Of The Self Allan N Schore, 2003-03-25 In 1994 Schore published his groundbreaking book *Affect Regulation and the Origin of the Self* This book builds from this landmark work and develops on his understanding of affect and the implicit self

Fairbairn's Object Relations Theory in the Clinical Setting David P. Celani, 2010-04-07 W R D Fairbairn 1889-1964 challenged the dominance of Freud's drive theory with a psychoanalytic theory based on the internalization of human relationships Fairbairn assumed that the unconscious develops in childhood and contains dissociated memories of parental neglect insensitivity and outright abuse that are impossible for the children to tolerate consciously In Fairbairn's model these dissociated memories protect developing children from recognizing how badly they are being treated and allow them to remain attached even to physically abusive parents Attachment is paramount in Fairbairn's model as he recognized that children are absolutely and unconditionally dependent on their parents Kidnapped children who remain attached to their abusive captors despite opportunities to escape illustrate this intense dependency even into adolescence At the heart of Fairbairn's model is a structural theory that organizes actual relational events into three self and object pairs one conscious pair the central ego which relates exclusively to the ideal object in the external world and two mostly unconscious pairs the child's antilibidinal ego which relates exclusively to the rejecting parts of the object and the child's libidinal ego which relates exclusively to the exciting parts of the object The two dissociated self and object pairs remain in the unconscious but can emerge and suddenly take over the individual's central ego When they emerge the other is

misperceived as either an exciting or a rejecting object thus turning these internal structures into a source of transferences and reenactments Fairbairn's central defense mechanism splitting is the fast shift from central ego dominance to either the libidinal ego or the antilibidinal ego a near perfect model of the borderline personality disorder In this book David Celani reviews Fairbairn's five foundational papers and outlines their application in the clinical setting He discusses the four unconscious structures and offers the clinician concrete suggestions on how to recognize and respond to them effectively in the heat of the clinical interview Incorporating decades of experience into his analysis Celani emphasizes the internalization of the therapist as a new good object and devotes entire sections to the treatment of histrionic obsessive and borderline personality disorders

Traumatic Experiences of Normal Development Carl H. Shubs, 2020-02-24 Traditionally trauma has been defined as negatively impacting external events with resulting damage This book puts forth an entirely different thesis trauma is universal occurring under even the best of circumstances and unavoidably sculpting the very building blocks of character structure In Traumatic Experiences of Normal Development Dr Carl Shubs depathologizes the experience of trauma by presenting a listening perspective which helps recognize the presence and effects of traumatic experiences of normal development TEND by using a reconstruction of object relations theory This outlook redefines trauma as the breach in intrapsychic organization of Self Affect and Other SAO the three components of object relations units which combine to form intricate and changeable constellations that are no less than the total experience of living in any given moment Bridging the gap between the trauma and analytic communities as well as integrating intrapsychic and relational frameworks the SAO TEND perspective provides a trauma based band of attunement for attending to all relational encounters including those occurring in therapy Though targeted to mental health professionals this book will help enable therapists and sophisticated lay readers alike to recognize the impact of relational encounters providing new tools to understand the traumas we have experienced and to minimize the hold they have on us

The Narcissistic / Borderline Couple Joan Lachkar, 2004-06-01 In this second edition of her groundbreaking book Dr Joan Lachkar addresses the ever changing faces and phases of narcissism within the context of marital therapy and discusses the new developments in the treatment of marital conflict Drawing from many different theoretical frameworks mainly self psychology Kohut and object relations Klein the works of D W Winnicott and Kernberg are expanded to further explain why couples stay in painful conflictual never ending relationships traumatic bonding The new chapters case illustrations and updated treatment sequences are invaluable to both beginning and experienced clinicians The Narcissistic Borderline Couple is an essential text for every marital therapist offering an improved understanding of marital pathology within the framework of our changing world

Object Relations Theory and Self Psychology in Soc Eda Goldstein, 2010-07-06 Object Relations and Self Psychology are two leading schools of psychological thought discussed in social work classrooms and applied by practitioners to a variety of social work populations Yet both groups have lacked a basic manual for teaching and reference until now For them Dr Eda G Goldstein's book fills a

void on two fronts Part I provides a readable systematic and comprehensive review of object relations and self psychology while Part II gives readers a friendly step by step description and illustration of basic treatment techniques For educators this textbook offers a learned and accessible discussion of the major concepts and terminology treatment principles and the relationship of object relations and self psychology to classic Freudian theory Practitioners find within these pages treatment guidelines for such varied problems as illness and disability the loss of a significant other and such special problems as substance abuse child maltreatment and couple and family disruptions In a single volume Dr Goldstein has met the complex challenges of education and clinical practice

Gerald Adler **Child and Adolescent Treatment for Social Work Practice** Teresa Aiello, 2010-05-11 An excellent introductory text for the beginning social work student Dr Aiello's unique style organizes and categorizes well what can be an overwhelming bombardment in disorganized clinical studies Highly readable useful and comprehensive *Child and Adolescent Treatment for Social Work Practice* Theresa Aiello, 1999 In response to this pressing need Dr Theresa Aiello of New York University has written *Child and Adolescent Treatment for Social Work Practice A Relational Perspective for Beginning Clinicians* Infused with authority wisdom and caring that have resulted from twenty five years of agency community and clinical practice consultation and classroom teaching Dr **The Fantasy Principle** Michael Vannoy Adams, 2004 The Fantasy Principle makes a strong case for a new school of psychoanalysis the school of imaginal psychology It radically affirms the centrality of imagination and emphasizes the transformative impact of images **The Matrix and Meaning of Character** Nancy J. Dougherty, Jacqueline J. West, 2013-12-02 Character structures underlie everyone's personality When rigidly defended they limit us yet as they become more flexible they can reveal sources of animation renewal and authenticity *The Matrix and Meaning of Character* guides the reader into an awareness of the archetypal depths that underlie character structures presenting an original developmental model in which current analytic theories are synthesised The authors examine nine character structures animating them with fairy tales mythic images and case material creating a bridge between the traditional language of psychopathology and the universal realm of image and symbol This book will appeal to all analytical psychologists psychoanalysts and psychotherapists who want to strengthen their clinical expertise It will help clinicians to extend their clinical insights beyond a strictly behavioural medical or cognitive approach revealing the potential of the human spirit **A Question of Time** Angela Molnos, 2018-06-12 Angela Molnos describes her own concept of destructive idealization in which splitting conceals its ultimate destructiveness which she found so clearly in her studies with staff working with AIDS sufferers She presented this book on the basis of her talks in 1993 and 1994

When the Body Is the Target Sharon Klayman Farber, 2002-11-05 In this comprehensive and insightful work Dr Sharon K Farber provides an invaluable resource for the mental health professional who is struggling to understand self harm and its origins Using attachment theory to explain how addictive connections to pain and suffering develop she discusses various kinds and functions of self harm behavior From eating disorders to body modifications such as tattooing Dr Farber explores the language of self harm and the translation of that language and its psychic functions in the therapeutic setting She tells us When the body weeps tears of blood we need to wonder what terrible sorrows cannot be spoken Brilliantly illustrated with rich clinical material this book offers a practical approach to the diagnosis assessment and treatment of the increasing number of patients whose emotions are expressed through bodily harm The challenges of working with patients who tend to view the world of relationships in terms of predator and prey are clearly explicated and the stormy countertransference responses that threaten to destroy the treatment are given a full hearing Finally she shows how the attachment relationship

formed in treatment can repair the traumatic attachment in mind body psyche and soul and can serve as the cornerstone of therapeutic change A Jason Aronson Book Interpreting and Holding Jeffrey Seinfeld, 1993 Interpreting and holding are the two major functions of the psychotherapist The former was exemplified by Freud and the latter by Winnicott The author describes the development and use of both these modalities and shows how both are used in specific therapeutic problems
