The Brain, Emotion, and Depression Edmund T. Rolls, 2018-06-28 There are myriad questions that emerge when one considers emotions and decision making What produces emotions Why do we have emotions How do we have emotions Why do emotional states feel like something What is the relationship between emotion reward value and subjective feelings of pleasure How is the value of good represented in the brain Will neuroeconomics replace classical microeconomics How does the brain implement decision making Are gene defined rewards and emotions in the interests of the genes Does rational multistep planning enable us to go beyond selfish genes to plans in the interests of the individual The Brain Emotion and Depression addresses these issues providing a unified approach to emotion reward value economic value decision making and their brain mechanisms The evolutionary adaptive value of the processes involved in emotion the neural networks involved in emotion and decision making and the issue of conscious emotional feelings are all considered The book will be valuable for those in the fields of neuroscience neurology psychology psychiatry biology animal behaviour economics and philosophy from the advanced undergraduate level upwards and for all interested in emotion and decision making

*The Dynamics of Modern Society* William Goode, 2017-09-05 Social research efforts are often more concerned with basic social processes or patterns than with the dynamic relationship between social processes and social institutions In this classic collection contributors posit generalizations drawn from contemporary sociology Their analyses go beyond elementary principles they interpret them qualify them or state them more precisely Each of the contributors focuses on the modern American social structure and they are either explicitly comparative or have made observations that clearly are meant to apply to many countries This volume both embodies and draws attention to newer developments in sociology Like most steps forward in an advancing science this orientation does not reject the older knowledge accumulated during earlier generations but incorporates and expands upon it The differences are in emphasis rather than any denial of the main

body of accepted theory On the other hand the collection may be said to represent a response to the many criticisms by humanists and sociologists alike of the mainstream of contemporary sociology as it existed at the time of original publication in the late 1960s Inquiries into social changes like sociological studies of historical phenomena may be viewed as modes of a comparative sociology They permit us to test more fully sociological generalizations The emphasis in this volume on historical and comparative studies and on social change parallels the growing attention of sociology to these problems During the 1960s social science turned from a nearly exclusive preoccupation with middle class populations to a concern with social relations in other societies past as well as present In addition to enriching our knowledge this broader view has increased both the precision and generalizing power of sociological principles Professional Ethics in Construction and Surveying

Greg Watts, Jason Challender, Anthony Higham, Peter McDermott, 2021-04-26 This textbook responds to the increasing demand for practical industry aligned ethical practices in quantity surveying construction management and related AEC professions Professional Ethics for Construction and Surveying addresses how existing ethical standards can be pragmatically applied to both private and contracting practice with case studies aligned with the ethical requirements of the main professional bodies After an introduction to ethics the authors present real world situations where the minimum legal and contractual requirements necessitate the combination of professional judgement and ethical decision making They outline how such situations arise then address how decisions can and should be made that are in keeping with the moral contractual and CSR requirements with cases covering the building lifecycle from procurement to handover Consequently the book brings together ethical theory existing worldwide ethical standards and the requirements of the RICS the CIOB and the ICES with the authors experiences of examining candidates for entry into the professional bodies The result is a professionally focused textbook aimed at vocational learners at both undergraduate and postgraduate taught levels and practitioners in construction engineering architecture and the wider built environment **ECIE2015-10th European**
