This publication of Fitzgibbons carefully researched investigation provides a privileged insight which both fills out and refocuses the picture She examines the operation of three performing arts companies from Ireland a country whose reputation for creativity bears little relation to its small size and population and finds that innovation in the arts requires uncommon dedication persistence and yes sacrifice qualities that have been blurred by the mythology of what makes for artistic innovation She studies the social and organizational context of most arts work today with emphasis on the effort that goes into the achievement of innovation and comes away with a new vocabulary and grammar for managing it Innovation in the arts is an arduous stressful process as it is in all areas of high achievement but the perception most people have of it is misinformed says Fitzgibbon Creativity management is confused with what is commonly known as creative management She shows it is possible to identify a number of factors that bear heavily on innovation in arts organizations So far the first study of the management of arts innovation specifically Fitzgibbon s work offers a privileged and pragmatic insight into the workings of highly innovative arts organizations The result is a graphic analysis that strips innovation down to its essentials and begins to answer vital questions This work is essential reading for arts policy makers managers administrators and those who would be donors and for serious students of arts and culture management in the academic community Instant Manager: Managing Change Bernice Walmsley, 2009-10-30 Whether you are building your career as a manager by taking
