John of the Cross Sam Hole, 2020-11-19 Through the dark night of the soul to the depiction of the erotically charged union of the soul and God the poetry and prose works of the Spanish friar John of the Cross 1542-1591 offer a striking account of the transformation of the individual in the course of the Christian life John of the Cross *Desire Transformation and Selfhood* argues that these writings are animated by John's own creative and subtly conceptualized notion of erotic desire John's understanding of desire has the potential to enrich recent theological discussion of the subject but it has been curiously neglected in past scholarship To correct this lacuna this study undertakes a detailed historical analysis in three parts Firstly it attends to the patristic medieval and sixteenth century Spanish influences on John's writings showing how John reworks a long tradition of biblical Christian and Platonic reflection on the concept Secondly it traces the importance of desire through John's writings demonstrating how he develops the theme through his poetry his anthropology of the soul and his account of the spiritual ascent Thirdly it explores the reception of his writings in the twentieth century demonstrating how particular modern philosophical and theological commitments have prevented scholars from recognising the rich and distinctive shape of John's theological vision John's account of the transformation of the self with its hopeful vision of the graced transformation of the soul's desires has significance beyond the constrained modern categories of systematic theology Christian spirituality pastoral theology and mysticism it is a vision that is worthy of recovery today

The Teleology of Action in Plato's Republic Andrew Payne, 2017-10-06 In many discussions of ancient philosophy teleology is acknowledged as an important theme How do we act for a particular end or purpose One common answer describes humans as acting with the intention of achieving a goal A person selects particular actions with the thought that these actions will lead to that goal Andrew Payne accepts that this is one good answer to our question but proposes that it is not the only one In Plato's Republic Socrates appeals to a different understanding of how humans act for the sake of ends as they live together in political communities and pursue knowledge As they carry out activities that are necessary for human flourishing their actions can produce unintended results that signal the full completion of human capacities For example performing the actions of a just individual can help promote the establishment of a just society as an unintended result Such unintended results qualify as ends or purposes of human action This volume fully explores this functional teleology of action

Perspectives on warm conveyor belts - sensitivities to ensemble configuration and the role for forecast error Pickl, Moritz, 2023-03-30 Warm conveyor belts WCBs are weather systems that substantially modulate the large scale extratropical circulation. As they can amplify forecast errors and project them onto the Rossby wave pattern, they are of high relevance for numerical weather prediction. This work elaborates on two aspects of WCBs in the context of ensemble forecasts: 1. sensitivities of WCBs to the representation of initial condition and model uncertainties and 2. the role of WCBs for forecast error growth.
