The Asian Currency Crisis The Taiwan Experience:

The Asian Currency Crisis, 1998 **The Asian Currency Crisis** Zhaocheng Mai, 1998 The Social Impact of the Asian Financial Crisis Yunpeng Zhu, Hal Hill, 2001-01-01 This volume presents a scholarly insider's perspective on the Asian economic crisis examining the social economic and political consequences of the crisis in six influential Asian economies Indonesia Korea Malaysia the Philippines Taiwan and Thailand Each chapter contains an analysis of the events leading up to and during the crisis the social impacts and an assessment of possible futures for these countries The contributors' expertise and use of up to date data ensures an integrated approach by which the process of economic change can be understood The book reveals that professional workers in the urban financial sector as well as manual labourers in the export sector felt the most dramatic effects Impacts on the latter group resulted in a significant rise in the population living below the poverty line The book emphasises the previous absence of strong social security nets and the need to strengthen macroeconomic policies and institutional legal regulatory and supervisory structures Other topics covered include intractable government corruption and fiscal management Beyond the Asian Crisis Anis Chowdhury, Iyanatul Islam, 2001-01-01 The volume is certainly interesting and well informed and would make a valuable addition to reading lists for courses on East Asian economic development Anne Booth Asia Pacific Business Review As Southeast and Northeast Asia recover from the Asian crisis and return to a state of growth the authors of this book assess the lessons to be learned from the crisis to achieve sustainable development in the future While the importance of each factor contributing to the crisis varies from country to country their collective experience has created unprecedented turmoil in current thinking on development policy **The Politics of the Asian Economic Crisis** T. J. Pempel, 2018-09-05 In the summer of 1997 a tidal wave of economic problems swept across Asia Currencies plummeted banks failed GNP stagnated unemployment soared and exports stalled In short the vaunted Asian Economic Miracle became the Asian Economic Crisis with serious repercussions for nations and markets around the world While the headlines are still fresh a group of experts on the region presents the first account to focus on the political causes and implications of the crisis The events of 1997-98 involved not just property values financial flows portfolio makeup and debt ratios they argue but also the power relationships that shaped those economic indicators As they examine the domestic regional and international politics that underlay the economic collapse the authors analyze the reasons why the crisis affected the nations of Asia in radically different ways The authors also consider whether the crisis indicates a radical change in Asia's economic future **From Crisis To Recovery: East Asia Rising Again?** Dianqing Xu, Tzong-shian Yu, 2001-08-30 It is interesting to note that after two years of recession in East Asia almost all the countries in this region are rising again In the wake of that sudden onslaught on the economies of East Asia many new questions have come to the fore and are waiting for the right answers such as How could the Asian countries have become so weak as to totally succumb to the financial crisis What were the real causes of the crisis What policy measures have the affected countries taken to combat the crisis and how

effective have they been As for the argument of hands off policy versus government intervention which approach was more appropriate for curbing the expansion of the crisis What are the policy implications of resolving the crisis Why is East Asia rising again after the two year recession The editors of this volume organized a research team composed of 12 leading economists from the ten East Asian countries Thailand Malaysia Indonesia the Philippines Singapore Hong Kong Taiwan Korea mainland China and Japan One expert from the United States was also invited he was responsible for making an aggregate analysis of the interdependence of the region in the context of a financial crisis Two meetings were held the first in April 1999 the second in January 2000

Financial Crises in "Successful" Emerging Economies Ricardo Ffrench-Davis, 2004-02-18 A Brookings Institution Press and Economic Commission for Latin America and the Caribbean ECLAC publication Financial crises in emerging economies are very different today than they were in the past Between 1940 and the 1970s such traumas involved large fiscal deficits repressed domestic financial systems and balance of payments situations that were associated with a sharp worsening of terms of trade In recent years however a new variety of crisis has evolved in Asia and Latin America Many of the emerging economies that have experienced financial trauma have been considered very successful until the crises explode This collection focuses on such economies The five contributors provide policy oriented analysis that seeks to identify crucial variables that affect the probability or intensity of crisis Jos Antonio Ocampo ECLAC and Ricardo Ffrench Davis explore the variables that play a part in determining whether a financial crisis is likely to occur They analyze vulnerability zones for certain key variables such as net liquid external liabilities current account deficits and real exchange rates and examine how and why capital surges have contributed to worsen macroeconomic fundamentals in emerging economies Manuel Agosin University of Chile draws a parallel between Korea and Taiwan showing how the two countries had similar histories between the mid 1960s and the early 1990s then followed different paths during the 1990s Ricardo Ffrench Davis ECLAC concentrates on Chile s experience with three positive financial shocks in the 1970s in 1991-94 and in 1995-97 Jaime Ros Notre Dame University explores contrasting situations in Mexico in 1991-94 and 1996-97 and discusses the variables that explain the marked differences between the two episodes Ricardo Ffrench Davis is principal regional adviser at ECLAC and co founder of the Center for Economic Research on Latin America CIEPLAN He is the author or editor of fifteen books on international economics development strategies foreign financial and Latin American economies including Reforming the Reforms Macro Trade Finance Palgrave Macmillan 1999

Industrial Policy in an Era of Globalization Marcus Noland, Howard Pack, 2003-03-07 Globalization reigns supreme as a description of recent economic transformation and it carries many meanings In the policy realm the orthodox terms of engagement have been enshrined in the Washington consensus But disappointing results in Latin America and transitional economies plus the Asian financial crisis have shaken the faith in Washington and elsewhere One response has been to hark back to the more statist policies that the consensus marginalized In this regard Japan Korea and Taiwan are promoted as the poster nations that have derived

great benefits from increasing integration with the international economy without surrendering national autonomy in the economic or cultural spheres effectively beating the West at its own game The fundamental questions addressed in this monograph are whether industrial policy was indeed a major source of growth in these three economies and if so can it be replicated under current institutional arrangements and if so is it worth replicating or would developing countries today be better off embracing the suitably refined orthodoxy *Industrial Policy in an Era of Globalization* Marcus Noland,Howard Pack,2003 Globalization reigns supreme as a description of recent economic transformation and it carries many meanings In the policy realm the orthodox terms of engagement have been enshrined in the Washington consensus But disappointing results in Latin America and transitional economies plus the Asian financial crisis have shaken the faith in Washington and elsewhere One response has been to hark back to the more statist policies that the consensus marginalized In this regard Japan Korea and Taiwan are promoted as the poster nations that have derived great benefits from increasing integration with the international economy without surrendering national autonomy in the economic or cultural spheres effectively beating the West at its own game The fundamental questions addressed in this monograph are whether industrial policy was indeed a major source of growth in these three economies and if so can it be replicated under current institutional arrangements and if so is it worth replicating or would developing countries today be better off embracing the suitably refined orthodoxy
