Denham, 2009-11-21 CAPTAIN is the story of the success of a young man that followed the current wherever it took him On that five decade voyage there were many storms confusing situations disappointments and some humor and happiness No matter the circumstance people either created the problems or helped resolve them It s therefore about people sea going folk The good and the great seem to appear when needed and good ship mates like Sam Ard Don Leonard Al and others were always there Read and meet Whiskey Bill Coach and Showboat and learn about the 25 hour days in the destroyers and exhaustive efforts the lads perform servicing the fleet Be with Captain John Devlin as he leads his officers and enlisted men in harms way **Boys at Sea** B. On Shoreless Sea Roy Grundmann, 2025-10-01 Combines new archival research with innovative theory to reassess the ship's dramatic voyage and analyze its representation in a broad range of texts films and artifacts of popular memory In 1939 the ocean liner MS St Louis undertook a dramatic voyage with over nine hundred Jewish refugees that caught the world's attention and has been remembered in numerous printed texts films and artifacts Denied permission to dock in Cuba the United States and Canada the ship was finally forced to return to Europe where many of the refugees ultimately perished in the Holocaust On Shoreless Sea is the first work to comprehensively analyze the journey's unfolding its historical context and its key representations in various media Based on new archival research and featuring a translation of Captain Gustav Schröder's account of the voyage the book corrects long standing misassumptions about its subject Author Roy Grundmann illuminates the voyage's historical significance and demonstrates its relevance to our present in which prosperous nations once again stem mass migration Arguing that the Jewish refugee crisis was caused not only by anti-Semitism but also by colonialism and neocolonialism Grundmann calls for Holocaust studies to expand its field of inquiry and methodology Working at the intersection of Holocaust studies postcolonial theory film and media studies and cultural studies On Shoreless Sea reads St Louis memory culture as a reservoir of contradictory attitudes toward migration whose texts both intentionally and inadvertently testify to the need to discuss the Holocaust in relation to other genocides without denying its uniqueness

Stratford and the Sea Lewis G. Knapp, 2002 For nearly four centuries the maritime history of Stratford Connecticut set the standard for the growing relationship between the United States and the sea For the long years when ocean and river were the only practical means of travel and from the struggles for independence to the quest for commerce that played out upon the waves Stratford's brave sons have navigated both Long Island Sound whose waters lap their shores and the wide world beyond Stratford and the Sea is the story of Captain David Hawley fighting to save the young American Revolution It is the story of privateer Samuel Nicoll's furious attacks on British shipping in the War

of 1812 that forever altered our nation's future And it is the story of merchant captains like Dowdall Sterling and Benjamin who pioneered transatlantic commerce and opened up trade routes to the Orient establishing American dominance in international trade But there is more to the story than the men who tell it Here also brought to life with 200 vintage photographs period maps and antique postcards is the tale of the rise and fall of the mighty oyster fishery the birth of decoy carving as a unique American folk art and the rush of progress and industry brought to town by Igor Sikorsky and his flying boats

The Real Cruel Sea Richard Woodman, 2011-07-06 The renowned maritime historian's compelling study of the vital role played by merchant seamen during WWII in the Battle of the Atlantic For the British the Battle of the Atlantic was a fight for survival They depended on the safe transit of hundreds of merchant ships carrying food and supplies from America to feed the country and keep the war effort going On top of that they had to export manufactured goods to pay for it all Britain's merchant navy a disparate collection of private vessels had become the country's lifeline While its seamen were officially non-combatants they bravely endured the onslaught of the German U boat offensive until Allied superiority overwhelmed the enemy Drawing extensively on first hand sources Richard Woodman establishes the importance of the British and Allied merchant fleets in the struggle against Germany This important study elevates the heroic seamen who manned these ships to their rightful place in the history of the Second World War

Hope at Sea Teresa Shewry, 2015-09-16 As far back as Thomas More's Utopia and Francis Bacon's New Atlantis the Pacific Ocean has inspired literary creations of promising worlds Hope at Sea asks how literary writers have more recently conceived the future of ocean living In doing so it provides a new perspective on art and imagination in the face of enormous environmental change Drawing together ecocriticism theories of hope and literary analysis this book explores how literary writers evoke hope in engaging with environmental upheavals that are reshaping life in the Pacific Ocean Teresa Shewry considers contemporary poetry short stories novels art and journalistic pieces from Australia New Zealand Hawai'i and other ocean sites examining their imaginative accounts of present life and future living in places where humans coexist with environmental loss rivers that no longer reach the sea dwindling populations of ocean life the effects of nuclear weapons testing and more These works are connected by their views of a future that includes hope Until now hope has never been theorized in a direct sustained way in ecocriticism Hope at Sea makes an argument for hope as a lens for creative and critical confrontation with environmental disruptions and the resulting sense of loss It also reflects on the critical approaches that hope as an analytic category opens up for the study of environmental literature With hope as a critical perspective Shewry develops a method for reading environmental literature literary writers create new ways to apprehend existing environmental realities and craft stories about seas forests cities and rivers that could be not as literal plans but as ways of imagining promising lives in the present world and in the world to come

The Gregg Writer, 1932

Trapped Under the Sea Neil Swidey, 2015-02-17 The harrowing story of five men who were sent into a dark airless miles long tunnel hundreds of feet below the ocean to do a nearly impossible job with deadly results A quarter century ago Boston had the dirtiest harbor in America The city had been dumping sewage into it for generations coating the seafloor with a layer of black mayonnaise Fisheries collapsed wildlife fled and locals referred to floating tampon applicators as beach whistles In the 1990s work began on a state of the art treatment plant and a 10 mile long tunnel its endpoint stretching farther from civilization than the earth's deepest ocean trench to carry waste out of the harbor With this impressive feat of engineering Boston was poised to show the country how to rebound from environmental ruin But when bad decisions and clashing corporations endangered the project a team of commercial divers was sent on a perilous mission to rescue the stymied cleanup effort Five divers went in not all of them came out alive Drawing on hundreds of interviews and thousands of documents collected over five years of reporting award winning writer Neil Swidey takes us deep into the lives of the divers engineers politicians lawyers and investigators involved in the tragedy and its aftermath

creating a taut action packed narrative The climax comes just after the hard partying DJ Gillis and his friend Billy Juse trade assignments as they head into the tunnel sentencing one of them to death An intimate portrait of the wreckage left in the wake of lives lost the book which Dennis Lehane calls extraordinary and compares with The Perfect Storm is also a morality tale What is the true cost of these large scale construction projects as designers and builders emboldened by new technology and pressured to address a growing population s rapacious needs push the limits of the possible This is a story about human risk how it is calculated discounted and transferred and the institutional failures that can lead to catastrophe Suspenseful yet humane Trapped Under the Sea reminds us that behind every bridge tower and tunnel behind the infrastructure that makes modern life possible lies unsung bravery and extraordinary sacrifice
