Congress. House. Committee on Un-American Activities, 1949 *A Military History of the Cold War, 1944-1962* Jonathan M. House, 2014-04-28 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced

European policy makers that effective deterrence and containment required building up and maintaining credible forces. Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty. In addition to examining the major confrontations nuclear and conventional between Washington, Moscow and Beijing including the crises over Berlin and Formosa, House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya, Kenya, Cyprus and Aden. Now more than fifty years after the events, House describes understanding the origins and trajectory of the Cold War as as important as ever. By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions. House's account of the complex relationship between diplomacy and military action directly relates to the insurgencies, counterinsurgencies and confrontations that now occupy our attention across the globe.

The History of Hydrogen Bomb and Why It Should Be Banned. John Richard Shanebrook, PhD, 2016-03-17 One of the first applications of the atomic bomb after Nuclear War I was to serve as the trigger for much more powerful hydrogen bombs. The explosion of an atom bomb emits nuclear radiation, heat, energy and photons. These emissions compress fusion fuel to thermonuclear conditions. From 1945 to 1949 the United States had a monopoly on nuclear weapons until August 29, 1949 when the USSR exploded its first nuclear device. Edward Teller was already actively working on the design of hydrogen bombs but J. Robert Oppenheimer opposed these efforts. It was President Harry S. Truman who approved the US program to design, build and test hydrogen bombs. Meanwhile the USSR had been secretly working on nuclear weapons since 1941 with extensive help from several spies including Klaus Fuchs. Both the United States and the USSR achieved early success with hydrogen bombs as was demonstrated by hundreds of test explosions that spread radioactive fallout around the entire Earth. It was the US BRAVO test of a huge hydrogen explosive device on March 1, 1954 that brought matters to a conclusion. The radioactive fallout proved to be lethal over thousands of square miles. The result was an international ban on testing nuclear weapons in the atmosphere, 1963. However the Wizards of Armageddon were busily preparing to fight and maybe win future wars fought with hydrogen bombs. These plans included risky maneuvers with live hydrogen bombs on planes, submarines and other mobile devices. Accidents happened and many hydrogen bombs were lost, blown apart or simply abandoned. The absolute worst aspect of hydrogen bomb explosions is global ecocide. The explosions are so powerful they harm the ozone layer and ignite huge fires on Earth that darken the skies. The latter was termed nuclear winter by Carl Sagan. The conclusion of this book is very simple: All hydrogen bombs should be banned forever.
