**The Child's Discovery of the Mind** Janet W. Astington,1993 Three year old Emily greets her grandfather at the front door We re having a surprise party for your birthday And it s a secret We may smile at incidents like these but they illustrate the beginning of an important transition in children s lives their development of a theory of mind Emily certainly has some sense of her grandfather s feelings but she clearly doesn t understand much about what he knows and surprises like secrets tricks and ties all depend on understanding and manipulating what others think and know Jean Piaget investigated children s

discovery of the mind in the 1920s and concluded that they had little understanding before the age of six But over the last twenty years researchers have begun to challenge his methods and revise his conclusions In *The Child's Discovery of the Mind* Janet Astington surveys this lively area of research in developmental psychology Sometime between the ages of two and five children begin to have insights into their own mental life and those of others They begin to understand mental representation that there is a difference between thoughts in the mind and things in the world between thinking about eating a cookie and eating a cookie This breakthrough reflects their emerging capacity to infer other people's thoughts wants feelings and perceptions from words and actions They come to understand why people act the way they do and can predict how they will act in the future so that by the age of five they are knowing participants in social interaction Astington highlights how crucial children's discovery of the mind is in their social and intellectual development by including a chapter on autistic children who fail to make this breakthrough Mind is a cultural construct that children discover as they acquire the language and social practices of their culture enabling them to make sense of the world Astington provides a valuable overview of current research and of the consequences of this discovery for intellectual and social development
