The Spectacle of Skill Robert Hughes,2015-11-17 I am completely an elitist in the cultural but emphatically not the social sense I prefer the good to the bad the articulate to the mumbling the aesthetically developed to the merely primitive and full to partial consciousness I love the spectacle of skill whether it s an expert gardener at work or a good carpenter chopping dovetails I don t think stupid or ill read people are as good to be with as wise and fully literate ones I would rather watch a great tennis player than a mediocre one Consequently most of the human race doesn t matter much to me outside the normal and necessary frame of courtesy and the obligation to respect human rights I see no reason to squirm around apologizing for this I am after all a cultural critic and my main job is to distinguish the good from the second rate Robert Hughes wrote with brutal honesty about art architecture culture religion and himself He translated his passions of which there were many both positive and negative brilliantly convincingly and with vitality and immediacy always holding himself to the same rigorous standards of skill authenticity and significance that he did his subjects There never was and never will be again a voice like this In this volume that voice rings clear through a gathering of some of his most unforgettable writings culled from nine of his most widely read and important books This selection shows his enormous range and gives us a uniquely cohesive view of both the critic and the man Most revealing and most thrilling for Hughes s legions of

fans are the never before published pages from his unfinished second volume of memoirs These last writings show Robert Hughes at the height of his powers and can be read only with pleasure and a tinge of sadness that his extraordinary voice is no longer here to educate us as well as to clarify and define our world Manual of Purpose-Made Woodworking Joinery Les Goring,2014-01-03 A practical introduction to woodworking and purpose made joinery this book starts with the basics of interpreting drawings and works right the way through to designing and making stairs Les Goring introduces each chapter with a brief historical overview of the topic then goes on to explain how to carry out each task in a step by step manner Including several hundred images this book covers everything a student or keen hobbyist needs to know in order to carry out their own work The breadth of coverage and easily accessible approach makes this book an ideal resource for apprentices taking NVQs and those following Construction Awards within Wood Occupations from City Guilds Construction Skills The technical detail and practical focus ensures that this book will be a vital purchase for all students and an essential reference for any experienced carpenter or joiner In depth practical and accessible approach ideal for new apprentices and experienced tradespeople alike Fully up to date with the current Building Regulations and developments in the trade Clear layout makes it easy to follow instructions Also by this author Manual of First and Second Fixing Carpentry 4th Edition 9781138295995 **Site Carpentry Level 2 Diploma** Leeds College Leeds College of Building,Patrick Joseph Clancy,Steven Leaverland,2013 At head of title Reed Property Construction
