

The Six Stages of Parenthood

"A book that is useful and important."

The New York Times

"Galinsky explores her intriguing theory in detail in this book, and the stories of the parents she interviewed make that theory come to life."

Parenting Advisor

Almost all books for parents focus on the way children develop. Ellen Galinsky, instead, writes about how parents develop. Drawing on the work in adult development of Erik Erikson and Daniel Levinson, she describes six distinct stages in the life of a parent: the image-making that occurs during pregnancy; the nurturing role that swallows parents up from birth through the first couple of years; the authority parents must develop as small children show independence; the interpretive stage when parents explain the world and their values to school-age children; the interdependent stage when teenagers challenge authority; and the departure years when parents let go and take stock of their accomplishments and failures.

Few parents will be able to resist tracing their own "passages" with the help of this book, and all those who do will find new insight and enjoyment at each stage.

Ellen Galinsky has been on the faculty of Bank Street College of Education in New York City for over twenty years. She directs many national and international research projects there and is a consultant on child and adult development to day-care programs, corporations, and the media. She is the author of *The New Extended Family*, *Family Matters in the Preschool Years*, and *Beginnings*.

Growing Each Other Up Sara Lawrence-Lightfoot, 2016-09-29 From growing their children parents grow themselves learning the lessons their children teach Growing up then is as much a developmental process of parenthood as it is of childhood While countless books have been written about the challenges of parenting nearly all of them position the parent as instructor and support giver the child as learner and in need of direction But the parent child relationship is more complicated and reciprocal over time it transforms in remarkable surprising ways As our children grow up and we grow older what used to be a one way flow of instruction and support from parent to child becomes instead an exchange We begin to learn from them The lessons parents learn from their offspring voluntarily and involuntarily with intention and serendipity often through resistance and struggle are embedded in their evolving relationships and shaped by the rapidly transforming world around them With Growing Each Other Up Macarthur Prize winning sociologist and educator Sara Lawrence Lightfoot offers an intimately detailed emotionally powerful account of that experience Building her book on a series of in depth interviews with parents around the country she offers a counterpoint to the usual parental development literature that mostly concerns the adjustment of parents to their babies rhythms and the ways parents weather the storms of their teenage progeny The focus here is on the lessons emerging adult children ages 15 to 35 teach their parents How are our perspectives as parents shaped by our

children What lessons do we take from them and incorporate into our worldviews Just how much do we learn often despite our own emotionally fraught resistance from what they have seen of life that we perhaps never experienced From these parent portraits emerges the shape of an education composed by young adult children an education built on witness growing intimacy and acceptance Growing Each Other Up is rich in the voices of actual parents telling their own stories of raising children and their children raising them watching that fundamental connection shift over time Parents and children of all ages will recognize themselves in these evocative and moving accounts and look at their own growing up in a revelatory new light
