Social History and Issues in Human Consciousness Andrew E. Barnes, Peter N. Stearns, 1989-01-01 *Social Histories and Issues in Human Consciousness* Andrew Barnes, 1990-09-01 0 **The Navigation of Feeling** William M.

Reddy, 2001-09-10 In *The Navigation of Feeling: A Framework for the History of Emotions* William M. Reddy offers a theory of emotions which both critiques and expands upon recent research in the fields of anthropology and psychology. Exploring the links between emotion and cognition between culture and emotional expression, Reddy applies this theory of emotions to the processes of history. He demonstrates how emotions change over time, how emotions have a very important impact on the course of events, and how different social orders either facilitate or constrain emotional life. In an investigation of Revolutionary France, where sentimentalism in literature and philosophy had promised a new and unprecedented kind of emotional liberty, Reddy's theory of emotions and historical change is successfully put to the test. *The American Family* David Peterson del Mar, 2011-11-07 Traces the movement from mutualism to individualism in the context of American family life. Families survived or even flourished during colonization, Revolution, slavery, immigration, and economic upheaval. In the past century, prosperity created a culture devoted to pleasure and individual fulfillment. **Motherhood, Childlessness and the Care of Children in Atlantic Slave Societies** Camillia Cowling, Maria Helena Pereira Toledo Machado, Diana Paton, Emily West, 2020-05-21 This book provides critical perspectives on the multiple forms of mothering that took place in Atlantic slave societies. Facing repeated child death, mothering was a site of trauma and grief for many, even as slaveholders romanticized enslaved women's work in caring for slaveholders' children. Examining a wide range of societies including medieval Spain, Brazil, and New England, and including the work of historians based in Brazil, Cuba, the United States, and Britain, this collection breaks new ground in demonstrating the importance of mothering for the perpetuation of slavery and the complexity of the experience of motherhood in such circumstances. This pathbreaking collection on all aspects of the experience, politics, and representations of motherhood under Atlantic slavery analyses societies across the Atlantic world and will be of interest to those studying the history of slavery as well as those studying mothering throughout history. This book comprises two special issues originally published in *Slavery Abolition and Women's History Review*. *Raising Citizens in the 'Century of the Child'* Dirk Schumann, 2010-09-01 The 20th century declared at its start to be the Century of the Child by Swedish author Ellen Key. She saw an unprecedented expansion of state activity in and expert knowledge on child rearing on both sides of the Atlantic. Children were seen as a crucial national resource whose care could not be left to families alone. However, the exact scope and degree of state intervention and expert influence, as well as the rights and roles of mothers and fathers, remained subjects of heated debates throughout the century. While there is a growing scholarly interest in the history of childhood, research in the field remains focused on national narratives. This volume compares the impact of state intervention and expert influence on theories and practices of raising children in the U.S. and German Central Europe. In particular, the

contributors focus on institutions such as kindergartens and schools where the private and the public spheres intersected on notions of race and ethnicity normality and deviance and on the impact of wars and changes in political regimes

An Emotional History of the United States Peter N. Stearns, Jan Lewis, 1998 Emotions lie at our very core as human beings How we process and grapple with our emotions how and what we emote and how we respond to the emotions of others constitute the essence of our social universe In a very real sense we exist only through the prism of our emotions And yet the profound effect of human emotion on history politics religion and culture remains underexamined While the influence of emotion in such realms as American foreign policy has been well documented other emotional aspects of American history have escaped notice What role for instance does emotion have in the practice of African American religion How do shame and self hatred influence American conceptions of identity How does our emotional life change as we age To what degree is American consumerism driven by basic human emotion With this landmark anthology historians Peter N Stearns and Jan Lewis provide a road map of the American emotional landscape From the emotional world of working class Massachusetts to the prayers of evangelical and pentecostal women and the gendered nature of black rage these essays provide a multicultural snapshot of the unique nature and evolution of American emotions

Christian texts such as the Gospel of Mark and sections from Paul's letters **Heaven on Earth** Richard Landes, 2011-08-04

Millennialists through the ages have looked forward to the apocalyptic moment that will radically transform society into heaven on earth. They have delivered withering critiques of their own civilizations and promised both the impending annihilation of the forces of evil and the advent of a perfect society. And all their promises have invariably failed. We tend therefore to dismiss these prophets of doom and salvation as crackpots and madmen and not surprisingly historians of our secular era have tended to underestimate their impact on our modern world. Now Richard Landes offers a lucid and ground breaking analysis of this widely misunderstood phenomenon. This long awaited study shows that many events typically regarded as secular including the French Revolution, Marxism, Bolshevism, Nazism not only contain key millennialist elements but follow the apocalyptic curve of enthusiastic launch, disappointment and often catastrophic re entry into normal time. Indeed as Landes examines the explicit millennialism behind such recent events as the emergence of Global Jihad since 1979 he challenges the common notion that modern history is largely driven by secular interests. By focusing on ten widely different case studies none of which come from Judaism or Christianity he shows that millennialism is not only a cultural universal but also an extremely adaptive social phenomenon that persists across the modern and post modern divides. At the same time he also offers valuable insight into the social and psychological factors that drive such beliefs. Ranging from ancient Egypt to modern day UFO cults and global Jihad, *Heaven on Earth* both delivers an eye opening revisionist argument for the significance of millennialism throughout history and alerts the reader to the alarming spread of these ideologies in our world today.

Cause for Alarm Amy S. Greenberg, 2014-07-14

Though central to the social, political and cultural life of the nineteenth century city, the urban volunteer fire department has nevertheless been largely ignored by historians. Redressing this neglect, Amy Greenberg reveals the meaning of this central institution by comparing the fire departments of Baltimore, St. Louis and San Francisco from the late eighteenth to the mid nineteenth century. Volunteer fire companies protected highly flammable cities from fire and provided many men with friendship, brotherhood and a way to prove their civic virtue. While other scholars have claimed that fire companies were primarily working class, Greenberg shows that they were actually mixed social groups: merchants and working men, immigrants and native born all found a common identity as firemen. *Cause for Alarm* presents a new vision of urban culture, one defined not by class but by gender. Volunteer firefighting united men in a shared masculine celebration of strength and bravery, skill and appearance. In an otherwise alienating environment, fire companies provided men from all walks of life with status, community and an outlet for competition which sometimes even led to elaborate brawls. While this culture was fully respected in the early nineteenth century, changing social norms eventually demonized the firemen's vision of masculinity. Greenberg assesses the legitimacy of accusations of violence and political corruption against the firemen in each city and places the municipalization of firefighting in the context of urban social change, new ideals of citizenship, the rapid spread of fire insurance and new firefighting technologies. Pontecorvo, Margherita Orsolini, Barbara Burge, Lauren B. Resnick, 2014-02-04 For decades research on children's literacy has been dominated by questions of how children learn to read Especially among Anglophone scholars cognitive and psycholinguistic research on reading has been the only approach to studying written language education Echoing this debates on methods of teaching children to read have long dominated the educational scene This book presents an alternative view In recent years writing has emerged as a central aspect of becoming literate Research in cognitive psychology has shown that writing is a highly complex activity involving a degree of planning unknown in everyday conversational uses of language At the same time developmental studies have revealed that when young children are asked to write they show a surprisingly sophisticated understanding of the representational constraints of alphabetic writing systems They show this understanding long before they can read conventional writing on their own The rich structure of meanings involved in the word text provided the glue that brought together a group of scholars from several disciplines in an international workshop held in Rome Reflecting the state of the field at the time the majority of the workshop participants were scholars working in languages other than English especially the romance languages Their work mirrors a linguistic and psychological research tradition that Anglophone scholars knew little of until recently This volume provides English language readers with updated versions of the papers presented at the meeting The topics discussed at the workshop are represented in the chapters as follows the relationship between acquisition of language and familiarity with written texts the reciprocal permeability between spoken and written language the initial phases of text construction by children and the educational conditions that facilitate written language acquisition and writing practice Family, Slavery, and Love in the Early

reading magical and religious books and reading as a means to developing civic agency These examinations reveal that books for teens depict teen readers as doers and suggest that their ability to read deeply critically and communally is crucial to the development of adolescent agency

Rapture Culture Amy Johnson Frykholm,2004-03-04 In the twinkling of an eye Jesus secretly returns to earth and gathers to him all believers As they are taken to heaven the world they leave behind is plunged into chaos Cars and airplanes crash and people search in vain for loved ones Plagues famine and suffering follow The antichrist emerges to rule the world and to destroy those who oppose him Finally Christ comes again in glory defeats the antichrist and reigns over the earth This apocalyptic scenario is anticipated by millions of Americans These millions have made the Left Behind series novels that depict the rapture and apocalypse perennial bestsellers with over 40 million copies now in print In Rapture Culture Amy Johnson Frykholm explores this remarkable phenomenon seeking to understand why American evangelicals find the idea of the rapture so compelling What is the secret behind the remarkable popularity of the apocalyptic genre One answer she argues is that the books provide a sense of identification and communal belonging that counters the social atomization that characterizes modern life This also helps explain why they appeal to

female readers despite the deeply patriarchal worldview they promote Tracing the evolution of the genre of rapture fiction Frykholm notes that at one time such narratives expressed a sense of alienation from modern life and protest against the loss of tradition and the marginalization of conservative religious views Now however evangelicalism s renewed popular appeal has rendered such themes obsolete Left Behind evinces a new embrace of technology and consumer goods as tools for God s work while retaining a protest against modernity s transformation of traditional family life Drawing on extensive interviews with readers of the novels Rapture Culture sheds light on a mindset that is little understood and far more common than many of us suppose
