Aby, James Nalen, Lori Fielding, 2005-04-30 Now in its third edition this critically acclaimed work provides undergraduate and graduate students faculty and librarians with descriptions of approximately 610 major reference sources in sociology its subdisciplines and the related social sciences Emphasis in this edition is on works in English published in the United States Great Britain Canada and Australia from 1997 through early 2004 Coverage of earlier works is included if coverage is historically important or not historically bound The third edition has been reorganized for ease of searching and adds over 325 new titles and electronic sources as well as surveying new editions and updates of previously cited works making this a substantial revision and complement to the previous edition      *Social Science Reference Services* Pam M. Agrawal,1992 *Statistical Sources for Social Research on Western Europe 1945-1995* Franz Rothenbacher,2013-11-11 The intention of this book is to give a picture of the complex material that has been published in the field of social and econornic statistics in Western Europe Although there are many guides bibliographies and reference books on special topics of this broad theme a general overview has been missing With this book I hope to fill this gap The frame of reference is a scientific one enabling and facilitating comparative social research on Western Europe In some respect this book enlarges and updates the bibliography written by Peter Flora Quantitative Historical Sociology pub lished in Current Sociology in 1975 In principle this guide is an annotated bibli ography of the most important printed material in the field of official statistics The legitimacy of such an approach lies in the fact that even today printed statistics are the most important form of dissemination of statistical results although microcom puters CD ROMs and the Internet have changed this situation In any case a spe cial section on statistical databases is included for every country describing the main databases of the statistical offices Furthermore the Internet address of each international or national statistical institute is provided in the introductory para graph This enables the reader to get fast access to online databases and supple mentary online information on statistics via the Internet
