Overcoming Inequality in Latin America

Ricardo Gottschalk, Patricia Justino, 2007-04-11 Latin America is faced with the challenge of achieving the Millennium Developmental Goal to halve poverty in the region by 2015 Historically this region has experienced persistently high levels of inequality and poverty the causes and consequences of which are analytically examined here Adopting a multidimensional approach this informative book focuses on the mechanisms that lead to higher inequality and emphasizes the role of

macroeconomics trade rules capital flows and the political electoral process It analyzes how inequality has hindered development how it interacts with a nation s economic social and political processes and how inequality constrains these processes in ways that weakens the prospect of establishing and sustaining a dynamic wealthy and creative society An international team of specialist contributors investigate and explain these crucial issues Examining the key economic policies and reforms which have exacerbated the region s extremely high inequality levels throughout this book they prescribe an alternative range of policy suggestions to help alleviate inequality and provide the foundations for more equitable development

Kacowicz,2013-02-07 The effects of globalization on poverty and inequality are a key issue in contemporary international politics yet they have been neglected in international relations and comparative politics literatures Arie M Kacowicz explores the complex relationships between globalization and the distribution of wealth as a political problem in international relations analyzing them through the prism of poverty and inequality He develops a political framework an intermestic model which captures the interaction between the international and the domestic domains and explains those effects with a particular emphasis upon the state and its relations with society He also specifies the different hypotheses about the possible links between globalization and the distribution of wealth and tests them in the context of Latin America during the years 1982 2008 with a particular focus on Argentina and the deep crisis it experienced in 2001

Inequality in Latin America David M. De Ferranti,2004-01-01 Latin America and the Caribbean has been one of the regions of the world with the greatest inequality This book explores why the region suffers from such persistent inequality identifies how it hampers development and suggests ways to achieve greater equity in the distribution of wealth incomes and opportunities The study draws on data from 20 countries based on household surveys covering 3 6 million people and reviews extensive economic sociological and political science studies on inequality in Latin America Four broad areas for action by governments and civil society groups to break the destructive pattern are outlined 1 build more open political and social institutions that allow the poor and historically subordinate groups to gain a greater share of agency voice and power in society 2 ensure that economic institutions and policies seek greater equity through sound macroeconomic management and equitable efficient crisis resolution institutions that avoid the large regressive redistributions that occur during crises and

that allow for saving in good times to enhance access by the poor to social safety nets in bad times 3 increase access by the poor to high quality public services especially education health water and electricity as well as access to farmland and the rural services and protect and enforce the property rights of the urban poor 4 reform income transfer programmes so that they reach the poorest families

The Performance of Nations Jacek Kugler, Ronald L. Tammen, 2012-09-16 Why do some nations fail while others succeed How can we compare the political capacity of a totalitarian regime to a democracy Are democracies always more efficient The Performance of Nations answers these key questions by providing a powerful new tool for measuring governments strengths and weaknesses Allowing researchers to look inside countries down to the local level as well as to compare across societies and over time the book demonstrates convincingly that political performance is the missing link in measuring power and military capability For the theorist political performance data helps to fill in the gaps when GDP alone does not explain the outcome of wars For the practical policy specialist political performance sheds a bright light on why some governments succeed and some fail why investments disappear in one province but multiply in another and why it is easier to promote health programs in one region but not in its neighbor This groundbreaking book will be an essential resource for scholars policymakers and institutions interested in measuring the political capacities of nations and in knowing where foreign aid and investment will be most effective Contributions by Mark Abdollahian Marina Arbetman Rabinowitz Constantine Boussalis Travis G Coan Yi Feng Gaspare M Genna Kristin Johnson Mathew Jones Kyungkook Kang Mariah Kraner Jacek Kugler Tadeusz Kugler Hal T Nelson Masami Nishishiba Peter Noordijk Saumik Paul Siddharth Swaminathan Ronald L Tammen John Thomas Ayesha Umar Wahedi and Birol Yesilada

Afrodescendants, Identity, and the Struggle for Development in the Americas

Bernd Reiter, Kimberly Eison Simmons, 2012-04-01 Indigenous people and African descendants in Latin America and the Caribbean have long been affected by a social hierarchy established by elites through which some groups were racialized and others were normalized. Far from being racial paradises populated by an amalgamated cosmic race of mulattos and mestizos, Latin America and the Caribbean have long been sites of shifting exploitative strategies and ideologies ranging from scientific racism and eugenics to the more sophisticated official denial of racism and ethnic difference. This book among the first to focus on African descendants in the region brings together diverse reflections from scholars, activists, and funding agency representatives working to end racism and promote human rights in the Americas. By focusing on the ways racism inhibits agency among African descendants and the ways African descendant groups position themselves in order to overcome obstacles, this interdisciplinary book provides a multi-faceted analysis of one of the gravest contemporary problems in the Americas.

Wellbeing and Development in Peru J. Copestake, 2008-11-24 This book presents findings of systematic research into the contested meanings of development and wellbeing from a country, Peru, which has recently experienced both rapid economic growth and deep social conflict.

Growth, Employment, Inequality, and the Environment A. Figueroa, 2015-04-22 Growth, Employment, Inequality, and the Environment deals with the fundamental economic problems of our time: employment, inequality, the environment, and quality of life. This exciting new volume is unique in that it is the first book of its kind in which these problems are analyzed using a unified theory framework. Figueroa achieves his goal by addressing two significant problems. First, to solve the epistemological challenges of building unity of knowledge, he presents a unified theory of capitalism. Second, he considers the epistemological problem of the role of theory in scientific knowledge. This book therefore deals with a consistent theoretical system. That having been said, these theories, which contain logically correct propositions, may turn out to be empirically false. In order to avoid this error, some rules of scientific knowledge are needed. Growth, Employment, Inequality, and the Environment presents a method that contains such rules. The method is derived from the Popperian epistemology, making it operational in economics. The proposed unified theory is therefore empirically valid; it is a good approximation of the real world. Theoretical economics is thus treated under explicit epistemological rules; theory is the servant, not the master.
